Tempo on JIRA Cloud and Release Change Logs

We deliver new versions of Tempo Timesheets for JIRA Cloud upgrade according to a schedule we have from Atlassian. For every delivery we create a page in our wiki listing all changes since last delivered version. We also create an upgrade request in the Atlassian JIRA project.

The delivered versions are tested by Atlassian against next JIRA Cloud version and upgraded according to Atlassian upgrade schedule.

 You can watch the Atlassian [What's New](#) page for all upgrade notes and this page for the table upgrade..

Below you can see the latest Tempo Timesheets delivery on JIRA Cloud.

Timesheets	Cloud Delivery / Release date	Issue	Status	Notes
Tempo Timesheets 7.20.24	Released on Cloud on February 14 2017	N/A	RELEASED	Contain migration task only that will run when instance is migrated to the new Cloud
Tempo Timesheets 7.20.18	Delivered 8 December 2016 Released on Cloud on January 3 2017	ACJIRA-1147 Restricted	RELEASED	Some permission changes are included in this version.
Tempo Timesheets 7.20.15	Delivered 2 September 2016 Released on Cloud on November 28 2016	ACJIRA-1028 Restricted	RELEASED	New Tempo Timesheets for JIRA Cloud documentation space is now public and will be updated for all new future deliveries.

See [Tempo Timesheets Cloud Releases](#) page for all Tempo deliveries to Atlassian for Tempo upgrade requests.

Timesheets

Tempo Timesheets is a time-tracking and time-planning add-on for JIRA. You can log time that you worked on different JIRA issues and plan time for future work. Your *user timesheet* displays the time that you logged. Depending on the permission that you have, you can also view other types of timesheets, where logged time is grouped by, for example, JIRA [project](#), customer [account](#), or JIRA issue.

Accessing Tempo Timesheets

Required permission

[Tempo Time Tracking](#) permission

Procedure

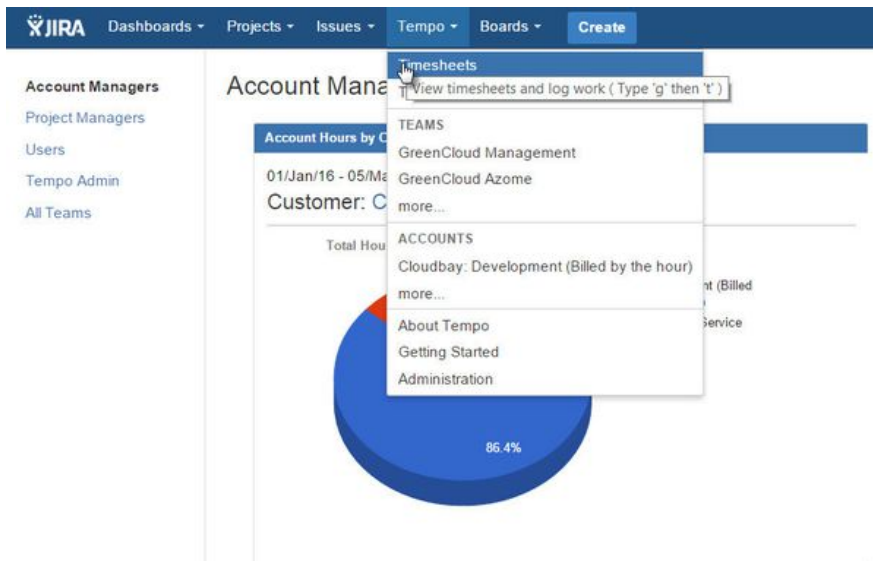

On the main menu bar, click **Tempo > Timesheets**.

Accessing Tempo Timesheets (click image to enlarge)

The user timesheet opens.

User timesheet (click image to enlarge)

Column colors

- Gray columns on the timesheet indicate weekends.
- Pink columns indicate other public holidays.
- A blue border surrounds the column for the current day.

Switching among different types of timesheets

You can switch among the following types of timesheets:

- User
- Project
- Team
- Account
- Advanced
- Issue

The type of timesheet that is currently displayed is indicated in the upper-left corner of the timesheet.

User ▾

John Steel ▾

User Timesheet, Assigned ▾

Return to current approval period

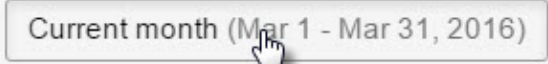

Key	Summary
 GM	GreenCloud Management
GM-2	Billing & Customer Reporting

Procedure

To switch to a different type of timesheet, click the small down-arrow, and select a timesheet type from the list.

Displaying different time periods

You can adjust your timesheet view to show a day, week, month, or custom period. You can also switch the display to the previous, current, or next period. [Learn more](#).

Displaying different views of the timesheet information

As well as selecting different timesheet types, you can select different views:

- Timesheet
- Calendar
- Report
- List

[Learn more](#) about different views.

The view that is currently displayed is indicated in the upper-right corner of the timesheet, beside the **Export** button.

Accessing user preferences

You can change the following user preferences:

My Supervisor

The name of your supervisor

Timesheet Actions

Whether you want to be notified by email during timesheet and planning approval processes

Team leads (and other users with Approve Timesheets permission) can also change the following user preferences:

Workload Scheme

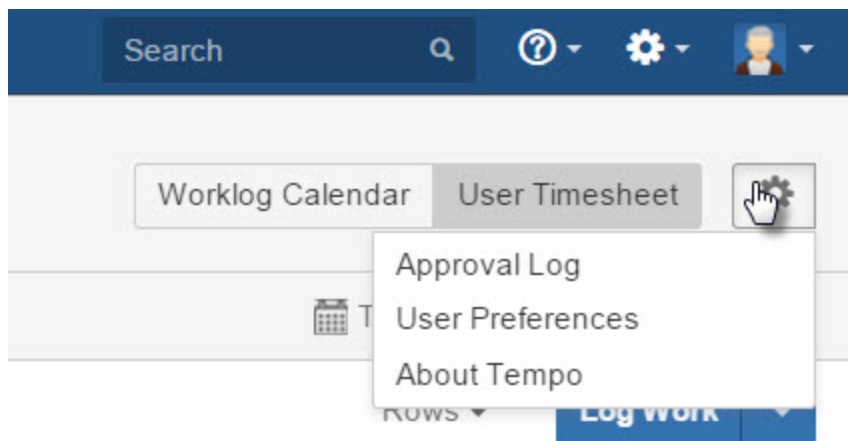

Specifies which days are working days

Holiday Scheme

Specifies which days are public holidays

Procedure

To access user preferences, click the gray cogwheel  in the upper-right corner of the timesheet, and select **User Preferences** from the list.

[Learn more](#) about user preferences.

Logging time that you worked on an issue

1. In the upper-left corner of any timesheet view, click **Log Work**.
2. In the Log Work window, fill in the requested information, and click **Log Work**.

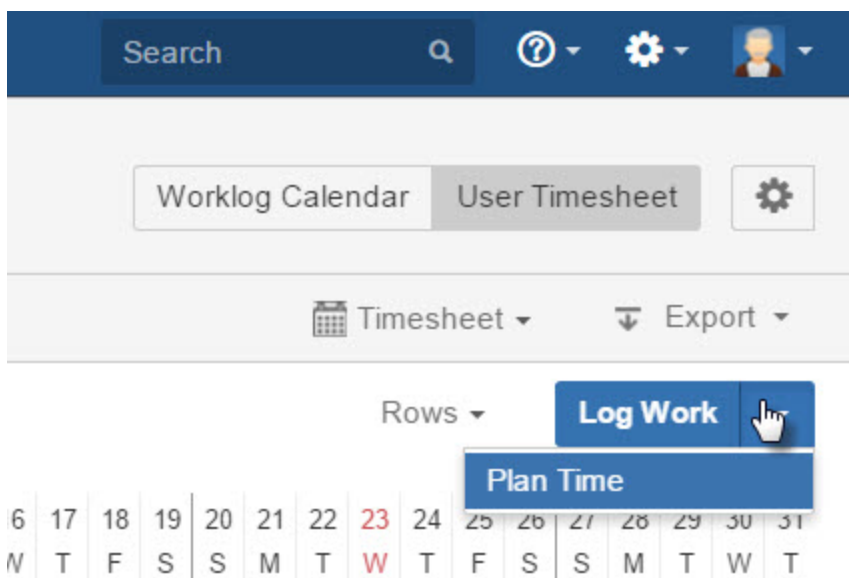

[Learn more](#) about logging work.

Planning time to work on an issue

If time planning is enabled, you can plan time to work on issues.

Procedure

1. In the upper-left corner of any timesheet view, click the small down-arrow beside **Log Work**, and then click **Plan Time**.

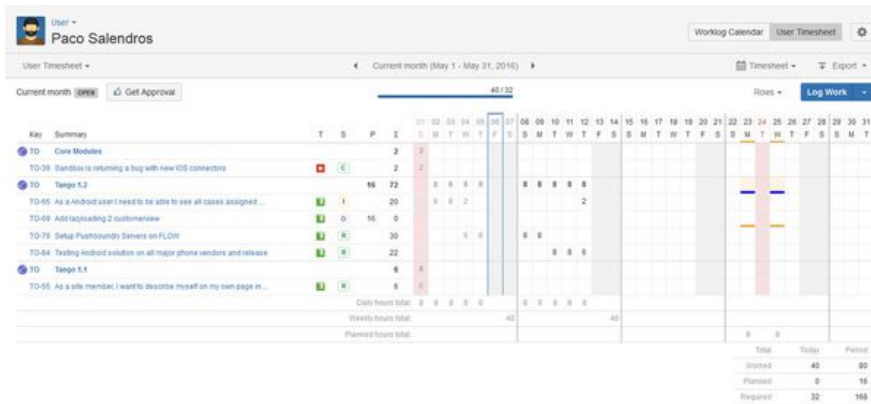

2. In the Plan Time window, fill in the requested information, and click **Plan Time**.

[Learn more](#) about time planning.

User timesheet

You can log your own work on your user timesheet. The timesheet gives you an overview of all the work that you logged over a period.

On this page

- Accessing your user timesheet
- Displaying JIRA issues on your user timesheet
- Submitting your timesheet for approval
- Hiding JIRA projects, versions, and components
- Reading the initial information columns
- Reading the 'total' rows

Video

Accessing your user timesheet

Required permission

Tempo Time-Tracking permission

Procedures

Accessing from the top menu bar

1. On the top menu bar, click **Tempo > Timesheets**.
2. In the upper-right corner, click **User Timesheet**.

Accessing from another type of timesheet

1. In the upper-left corner, click the small text (**Project**, **Team**, **Account**, **Advanced**, or **Issue**, depending on which type of timesheet is displayed).
2. From the list that is displayed, select **User**.

Displaying JIRA issues on your user timesheet

All issues that you logged time on during the period are displayed by default. You can display other issues by [selecting a JIRA filter](#).

Submitting your timesheet for approval

If the timesheet approval process is enabled, team leads and other users with Approve Timesheet permission can approve the timesheets of team members from the team timesheet. The approval status (for example, **APPROVED**, **READY TO SUBMIT**, or **OPEN**) is displayed in the upper-left corner.

To submit your timesheet for approval, click **Get Approval**.

- [Timesheet approval process](#)

Hiding JIRA projects, versions, and components

JIRA projects, versions, and components are collectively called *activities* in Tempo Timesheets. Activities are displayed by default on your user timesheet. You can hide activities and display only JIRA issues by completing the following steps:

1. In the upper-right corner, click **Rows**.
2. Clear the **Activities** checkbox.

Related topics

- [Additional rows and columns](#)

Reading the initial information columns

Symbo l	T	S	P	B	
Stands for	Type	Workflow status	Planned hours	Billed hours	Logged hours
Explan ation	JIRA Issue type	The workflow status of the JIRA issue.	The total number of planned hours in the row, in the displayed time period.	The total number of billed hours in the row, in the displayed time period.	The total number of logged hours in the row, in the displayed time period.
Note				<p>The Billed column is displayed if one or both of the following conditions are met:</p> <ul style="list-style-type: none"> • Users with Approve Timesheet permission can set billed hours • Team members can set billed hours <p>Related topic</p> <p>Approval processes and accounting</p>	

Reading the 'total' rows

Daily hours total	Refers to logged hours
Weekly hours total	Refers to logged hours
Planned hours total	Refers to daily planned hours

Total	Today	Period
Worked	All logged hours for the displayed period that are before or on today's date	All logged hours for the displayed period
Planned	All planned hours for the displayed period that are before or on today's date	All planned hours for the displayed period
Required	Your required working hours for the displayed period that are before or on today's date	Your required working hours for the displayed period

Viewing a team member's timesheet

Required permission

- [JIRA Browse Users](#) permission
- [Approve Timesheets](#) permission for the team

Tip

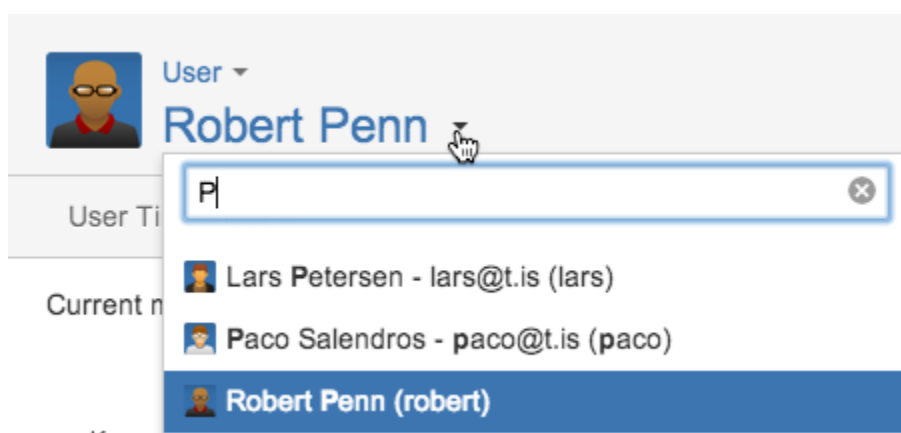

If you also want to be able to log work for the team member, the following checkbox must be selected in Tempo Global Configuration: [User with Approve Timesheet Permission can log work for team members](#)

Procedure

1. Open your own [user timesheet](#).
2. In the upper-left corner, click your name.
3. In the search field that is displayed, start typing the name of the team member.
4. When the team member's name is displayed, click the name.

Tip

Only users who are members of teams for which you have Approve Timesheets permission are available for selection.

**Displaying more issues on the user timesheet**

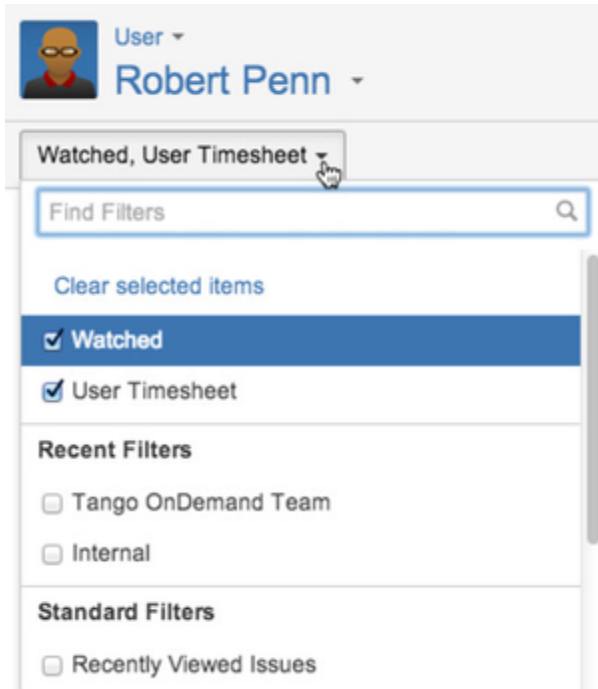

By default, the user timesheet lists issues on which you logged work for the displayed period. You can display other issues on the timesheet by selecting one or more JIRA filters.

Required permission

Browse Projects [permission](#) for the project that is associated with the filter.

Procedure

1. In the upper-left corner of the page, under the user's name, click the small text.

2. Do one or both of the following tasks:

- From the list, select the filters from which you want to display issues on the user timesheet.

Tips

- The available filters are associated with your JIRA permissions. If you have [Approve Timesheet](#) permission and are viewing another team member's user timesheet, your own filters are displayed, not the team member's filters.
- The **User Timesheet** filter is the default filter, containing issues on which you logged work for the displayed period.

- At the top of the list, in the **Find Filters** field, search for and select other filters.

Issues from the selected filters are displayed on the user timesheet.

Tips

- Under the user's name, the names of the selected filters are listed on one line. If three dots are displayed at the end of the line, you can see the complete list by hovering over the text.

- The timesheet progress bar is not displayed if the **User Timesheet** filter is not selected.

Timesheet view options

This is a child page of [Timesheets](#), explaining the different view options available in the Tempo Timesheets header area. This page and it's child pages cover view options for all types of timesheets.

Tempo Timesheets header area (click to enlarge)

On this page

- [Timesheet Views](#)
- [Export Options](#)

In this chapter

Timesheet Views

Each type of timesheet can be viewed in four different ways - see the drop-down menu to the right in the Tempo Timesheets header area. The default view option is simply called **Timesheet**, but timesheets can also be displayed in a **Calendar** view. Two more views are available, one is called **Report** and the other **List**.

Four different timesheet views

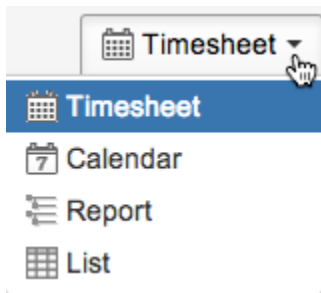

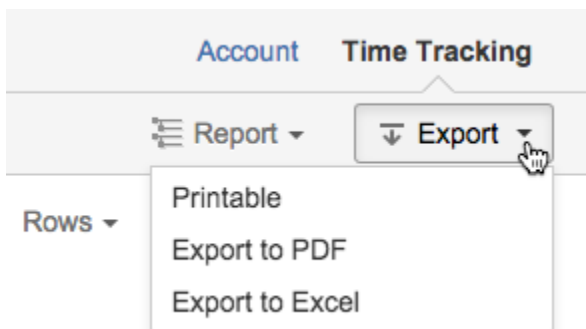

Table: Timesheet views explained

Display option	Denoted Icon	Description
Timesheet		This is the default view of timesheets, which many use to Log Work and to get an overview for a chosen period.
Calendar		The Calendar view is useful to view your planned and scheduled activities. i The Calendar View is not available in the Account and Advanced Timesheets.
Report		The report view displays worklogs in association with JIRA Projects, but it is also possible to filter out the worklogs, issues or activities and just view the projects.
List		This view displays one JIRA Issue per line and gives a good overview of worklogs.

Export Options

The Export menu offers a *Printable* view and *Export to Excel* for all timesheets. The option Export to PDF is only available in the Report view for the Account Timesheet if the feature is enabled in Tempo administration.

Export menu options

Selecting the *Printable* option, displays a printer friendly view of the screen and the browser printer function can then be used to print out.

i You may want to select an option in the [Rows](#) list before printing out as the default display is by worklogs.

The option Export to PDF, allows the user to export account(s) to a PDF file. Clicking the *Export to Excel* option, downloads an excel file containing the content of the current screen.

Related topics

- [Exporting worklogs as an Excel file](#)
- [Exporting account worklogs as a PDF file](#)

Additional rows and columns

This is a child page of [Timesheet view options](#), explaining the **Rows** and **Columns** menus.

Rows Menu

The Rows menu is available in the [User timesheet](#) and all Timesheet [Report Views](#), where rows can be removed or added.

Rows in User Timesheet

Activities are a JIRA Project, Version or Component, which belonging issues are grouped by in the [User timesheet](#), when the option is selected, but it is set by default. With the **Closed** option selected, all issues with resolution are displayed in the timesheet.

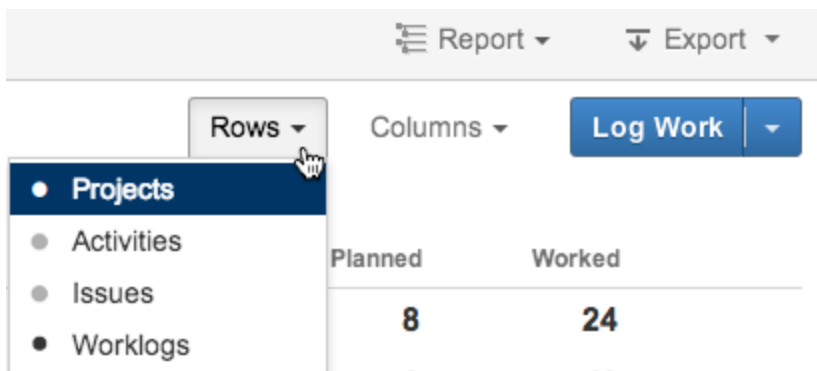

i When Activities is selected, the Closed menu item is not available (this will soon be changed in a future version).

Rows in the User Report View

On this page

- [Rows Menu](#)
- [Columns Menu](#)

In this chapter

The menu looks the same for all Report views, except the *Team Report View*, where the option **Users** is available, instead of Projects. With the Projects/Users level set, the least granularity information is displayed. As the levels/rows are added, more granularity is added, e.g. Activities, Issues and then the most granularity is reached with Worklogs.

Columns Menu

The Columns menu is available in all [Report Views](#) and [List Views](#), to remove or add columns as needed. It looks the same in each Report View, except the options *Planned* and *Worked* are not included in the *Account Report View*.

Columns in Report View

<input checked="" type="checkbox"/> Tempo Account
<input checked="" type="checkbox"/> Estimated
<input checked="" type="checkbox"/> Remaining
<input checked="" type="checkbox"/> Planned
<input checked="" type="checkbox"/> Worked
<input type="checkbox"/> External

The menu similarly looks the same in each List View, except the option *Worked* is not included in the *Account List View*.

Columns in List View

<input type="checkbox"/> Account
<input checked="" type="checkbox"/> Estimated
<input checked="" type="checkbox"/> Remaining
<input checked="" type="checkbox"/> Worked
<input type="checkbox"/> External
<input type="checkbox"/> Created
<input type="checkbox"/> Updated
<input checked="" type="checkbox"/> Status

The menu options that are ticked by default, are displayed by default in the Report and List Views. The screenshots above show the default options, but items can be added to the menu if configured by administrators. Some of them are explained below. Each menu has division lines to group items together, based on where they originated from. For example the default List View Columns menu, shows first items from JIRA Issues (*Tempo Account*, *Estimated*, *Remaining*), the next

section shows the default worklog attributes (*Worked*, *External*) and finally worklog details (*Created*, *Updated* and *Status*).

i Note, as explained for the Account item below, if additional [worklog attributes](#) are defined, they are added to the worklog details section in the Columns menu.

Table: The Views menu items explained

Account	Refers to Tempo Accounts - the account may be a custom field in JIRA Issues or set as a worklog attribute . i If set as a worklog attribute, the item is shown in the worklog attributes section of the menu.
Estimated	Adds a column for the hours estimation given to an JIRA Issue.
Remaining	Adds a column for the hours remaining for an JIRA Issue.
Planned	Adds a column for planned hours. Is displayed by default, since the User can plan time is set by default.
Worked	Adds a column for worked hours, as when the work was logged .
Billed	Adds a billed hours column, but it is not <i>displayed</i> by default. Managed as options in global configuration , need to be set for this menu item to become available.
External	Adds a column for worklogs that have been accepted by an external system and only these worklogs are displayed. This means that when worklogs have been coordinated with the external system, the <i>Worked</i> and <i>External</i> columns display the same value. i If there is no external system in use, all worklog rows display the value 0 in this column.
Created	Adds a column displaying the time when the worklog was created.
Updated	Adds a column displaying the time when/if the worklog was updated.
Status	Adds a column for the status of the worlogs, e.g. if they are somehow invalid or not.

Date navigation

You can adjust your timesheet view to show a day, week, month, or custom period. You can also switch the display to the previous, current, or next period.

In this chapter

Tutorial

(Video without voiceover. Time: 0:44)

Date navigation

The Date Navigation button

Use the arrows to navigate between the next (right arrow) or the previous (left arrow) Day, Week, Month or Custom period.

Click anywhere on the Date Navigation button (between the arrows), to open the window to adjust what to display.

The Date Navigation window, showing the Current month

◀ Current month (Nov 1 - Nov 30, 2013) ▶

Day Week **Month** Custom

Earlier ▾ Last Current Next

From 1/Nov/13

To 30/Nov/13

Starting: 1st 10th

Apply Cancel

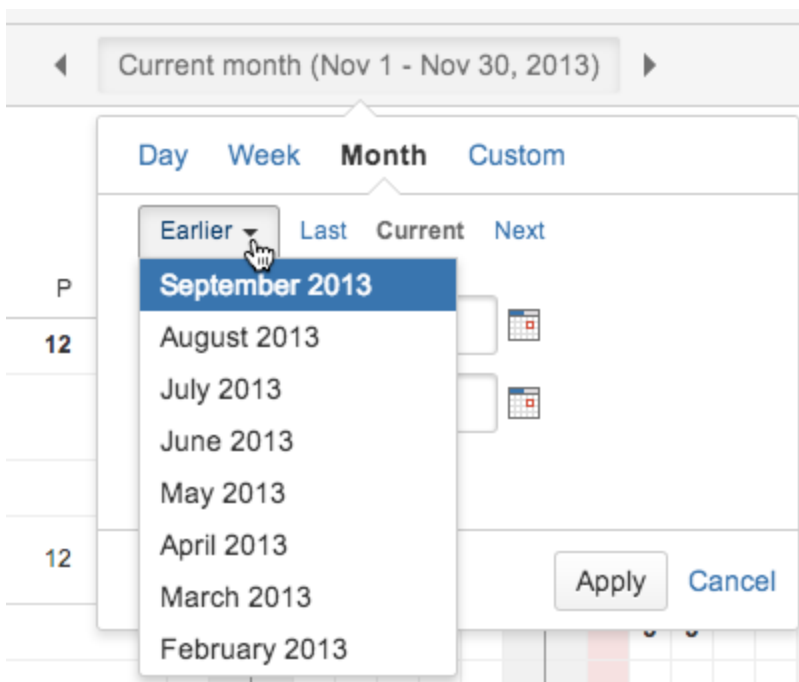

At the top of the window are tabs to change between a Day, Week, Month or a Custom period. Click on the **Apply** button to save changes or the **Cancel** link to close without saving.

Clicking somewhere outside the window closes it. If you do some changes in the window but do not hit the Apply button, the changes persist in the window until the timesheet is refreshed, even though you close the window.

The screenshot above shows the window for a Month and there are links to navigate to the **Last month** and **Next month**. It is possible to edit the dates in the **From** and **To** date fields, either by typing into the fields or clicking the calendar button to the right of each field. The screenshot below shows a drop-down to the left, with eight months previous to the Last month at any given time.

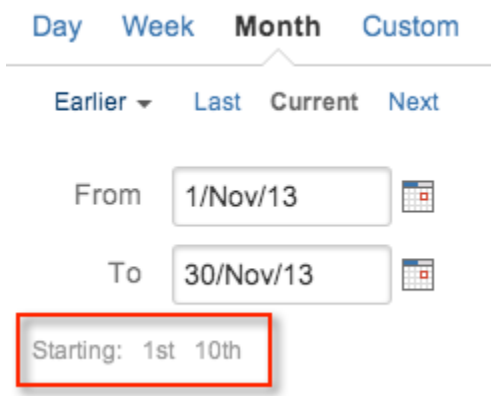

If the dates are changed such that they don't match a Month (Period), then the window sends the user into the Custom tab.

The Date Navigation window, showing eight months earlier than the Last month

In the screenshot below, two different start dates are shown for the month, since the 2nd period has been configured for this setup.

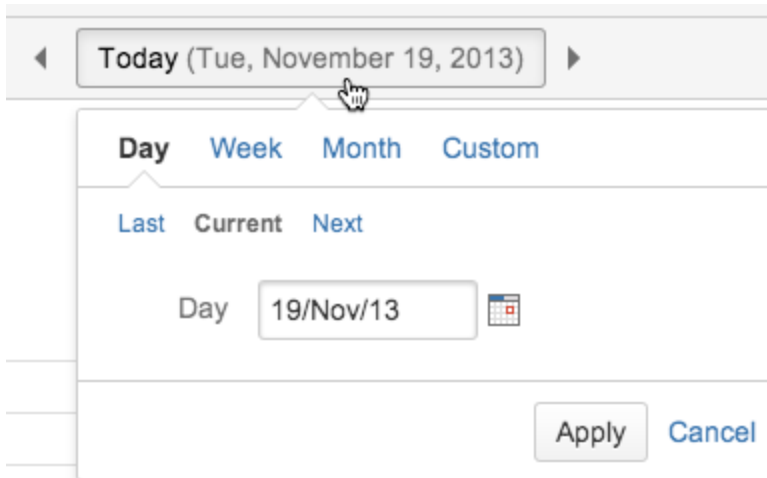

Current month with 2nd period shown

i The 2nd period can only be defined for the Month view and therefore the **Starting:** line is only shown at the bottom of the window for this option. If the default and 2nd periods start on a day different from the 1st of the month, three dates will be shown on this line.

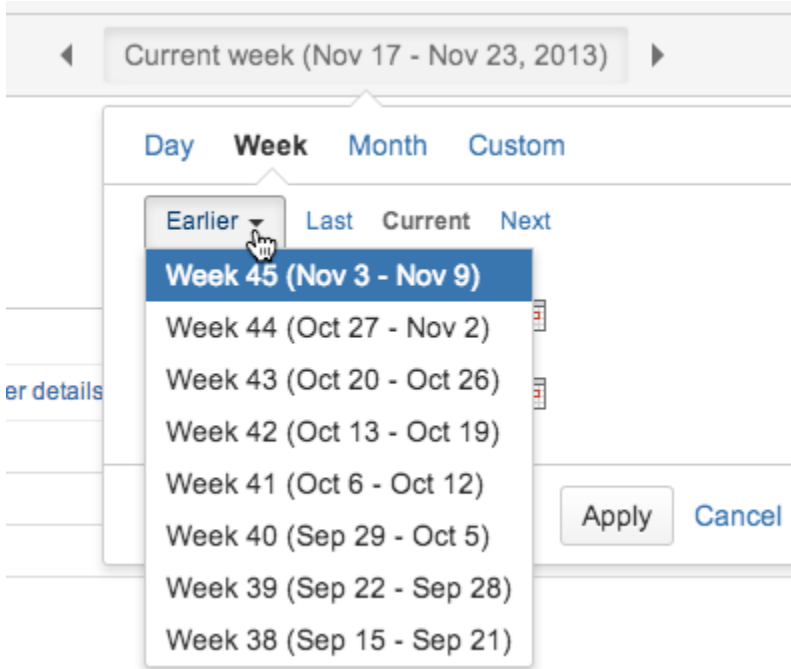

The screenshots below shows the window when the Day, Week or the Custom options are selected.

The Date Navigation window, showing current date

Similar to the Month option, there are links to navigate to **Yesterday** or **Tomorrow** and only one date field **Day** is shown.

The Date Navigation window, showing a Week or Current week

i Note that it is possible to navigate with links to the **Last week** and **Next week**, but a drop-down is also available for the eight weeks previous to the Last week at any given time.

The Date Navigation window, showing a Custom period

i Note the navigation links for the **Last 7 days**, **Last 14 days** and **Last 30 days**. Dates can be selected in the **From** and **To** fields as in other tabs. The Custom period chosen becomes the date range for the Date Navigation arrows to jump to, either back or forward in time.

! The max date range for Timesheet view is 62 days (2 months) for performance reasons but it is unlimited in Report view.

Table: Sample Date Navigation images outside the current option

Date Navigation sample image	Comment
◀ Thursday, November 21, 2013 ▶	When the day to view is not Yesterday, Today or Tomorrow, the weekday is displayed in front of the date.
◀ Week 49 (Dec 1 - Dec 7, 2013) ▶	If the week is not Last week, Current week or Next week, the week number in the year is shown in front of the date range.
◀ January '14 (Jan 1 - Jan 31, 2014) ▶	If the month is not Last month, Current month or Next month, the month name and year is shown in front of the date range.
◀ Current period (Nov 10 - Dec 9, 2013) ▶	If a 2nd period is configured and the month starts on a date different than the 1st, the date range is referred to as period.
◀ Period 0114 (Jan 10 - Feb 9, 2014) ▶	The 2nd period is configured and the view is not Last, Current or Next period, the view simply shows Period with the number of the month the date starts in plus the year.

Viewing timesheet in report view

Tempo timesheets can be viewed in report view to provide users and project managers with a quick overview of the worklogs status for the selected period. The sum of all work is displayed at the bottom of the report, grouped by user.

A team timesheet, as displayed in report view (click to enlarge)

Date	Time	Description	User	Account	Estimated	Remaining	Planned	Worked
Gregory Nolan (gregory)								80
GM - GreenCloud Management						301	1	1

Flexible reporting

Accessing the team timesheet report view

Required permission

- Browse team permission
- Approve Timesheet permission to view all worklogs logged by team members
- [Tempo Project Managers](#) role (if you want to view all worklogs logged by team members)

Procedure

1. On the main menu bar, click **Tempo > Timesheets**.
2. On your user timesheet, in the upper-left corner, click **User > Team**.
3. On the team timesheet, in the upper-right corner select **Timesheet > Report**.

Related topics

- [Timesheet view options](#)
- [Additional rows and columns](#)

Reading the initial information columns

By default the following columns are displayed in the list view. You can add and remove columns by clicking **Columns** in the upper-right corner.

Header	Stands for	Note
Date	Date of work	
Time	Time of work	Only displayed if Log work with start time is enabled
Description	Worklog description	
User	Owner of worklog	
Account	Tempo account	

Estimated	Original estimate from the JIRA issue	
Remaining	Remaining estimate from the JIRA issue	The remaining estimate value when list view is displayed
Planned	Planned hours	The total number of planned hours is displayed in bold text.
Worked	Worked hours	The total number of worked hours is displayed in bold text.

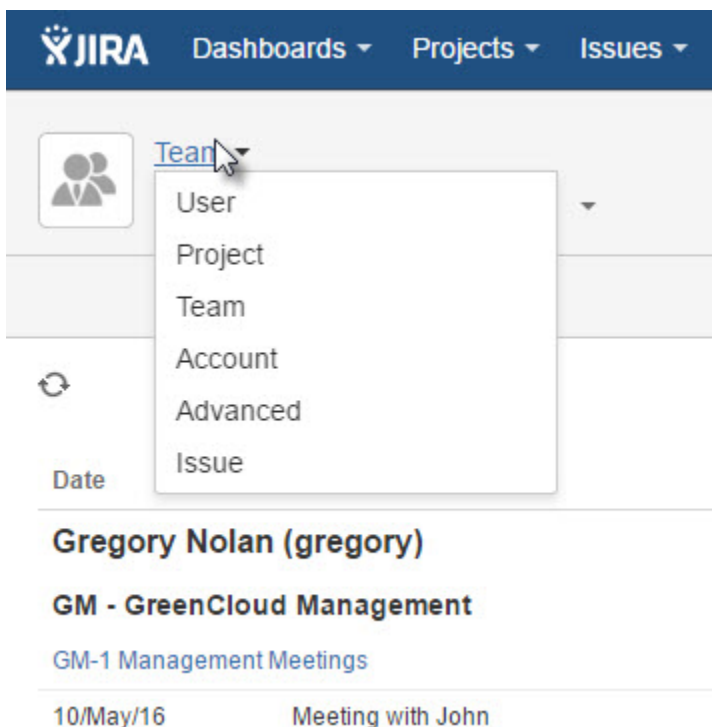

You can edit worklogs in the report view if the selected period is open for edit.

Related topics

Viewing the list view of a different timesheet

1. In the upper-left corner of the team timesheet, click **Team**.
2. From the list, select the timesheet that you want to view.

Invalid worklogs

This page explains the various reasons why a worklog is invalid. The **Status** column in any *list view* shows if the worklogs are invalid and for which reasons. The [Advanced Timesheet](#) and any of its views, have a standard **Invalid Worklogs** filter available.

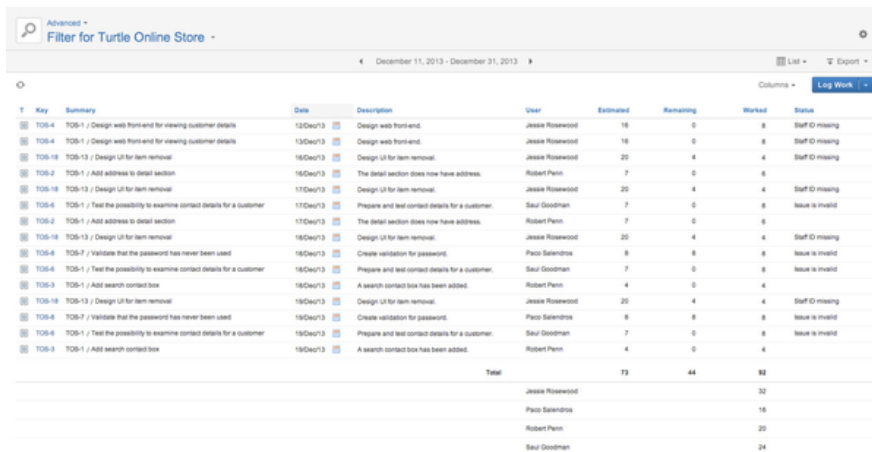

Issues with invalid worklogs are displayed with an *Invalid Worklogs* label, at the end of the issue line in timesheets. This accounts for the [User](#), [Advanced](#) and the [Issue Timesheet](#) (if Include sub-tasks is ticked).

The List View showing Invalid Worklogs reasons in the Status column

					Total	79	44	92	
					Jesse Rosewood			32	
					Pato Salendros			16	
					Robert Penn			20	
					Saul Goodman			24	

The table below explains the three reasons why a worklog can become invalid.

Status	Description
Issue is Invalid	<p>This message is displayed if a required field is missing, according to the set Expression on the Fields screen.</p> <ul style="list-style-type: none"> For example if the Expression has been set to the value fixVersions, the JIRA Issue <i>Fix Versions/s</i> field has become required. Another example is, if the Accounts Custom Field is included in the Expression.
Staff ID missing	<p>If the user does not have a Staff ID user property set, the message Staff ID missing is displayed.</p> <ul style="list-style-type: none"> This results from a mismatch between JIRA's User Property settings and Tempo Fields settings. For example if the Staff ID User Property is configured to SSN, but lacking in the JIRA's User Property settings for a user, the Staff ID missing message is displayed on worklogs entries for this user.
External message	<p>The last type of message in the Status column is if Tempo data is synced with an external system. The message is either OK or some error message from the external system.</p>

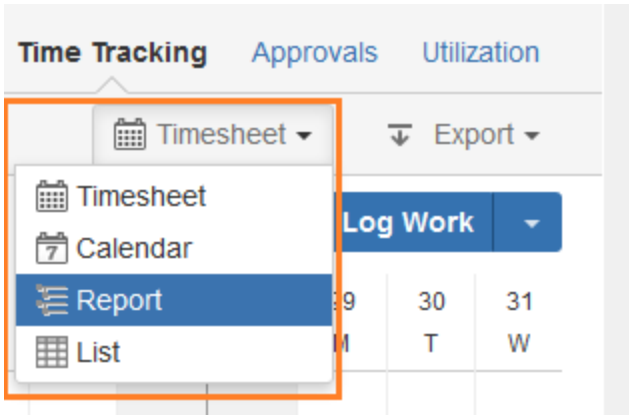

Exporting worklogs as an Excel file

You can export worklogs that are related to a user, team, project, account, filter, or issue over a selected period, as a Microsoft® Excel® file.

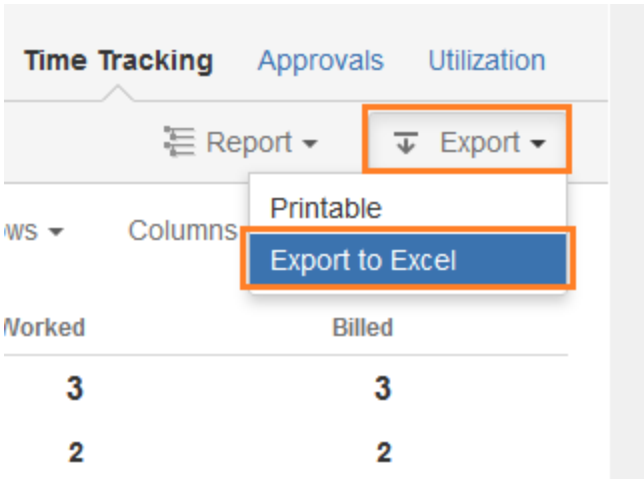

Procedure

To export worklogs as an Excel file, complete the following steps:

- Go to the timesheet that you want to export worklogs from.
- Optional:** You can open the timesheet view, report view, or list view. These three views have the same option for exporting worklogs as the same Excel file. The calendar view does not have this option.

- 3. Above the timesheet, in the center, select the period that you want to export worklogs for.
- 4. In the upper-right corner, click **Export** > **Export to Excel**.

- 5. Open or save the Excel (.xls) file.

Exporting worklogs as a PDF file

You can export a list of all worklogs for an account over a selected period as a PDF file.

Note
Worklogs for global accounts are not exported.

In this chapter

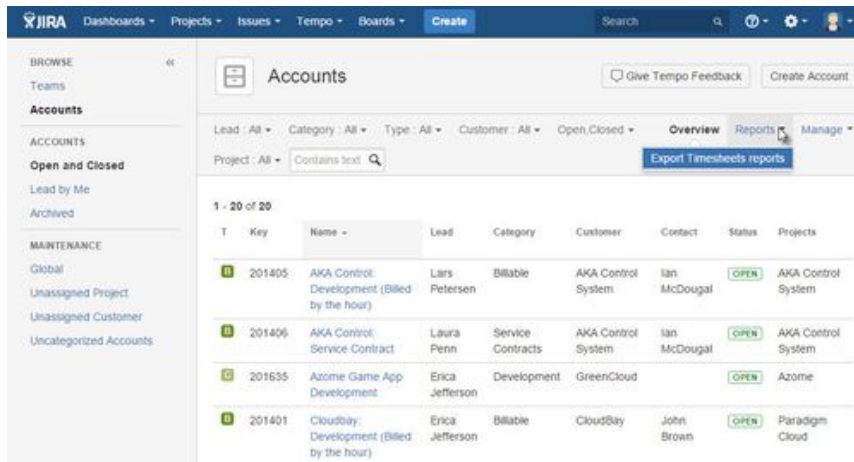

Required permission

Approve Timesheet permission

Procedure

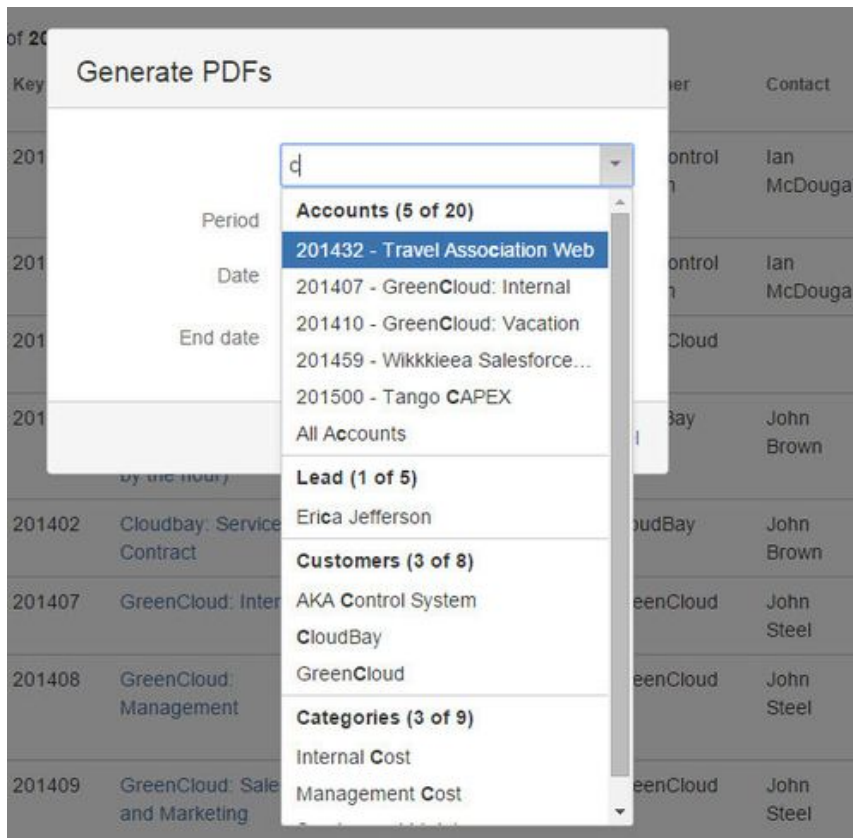

To export an account worklog list as a PDF file, complete the following steps:

- 1. Go to the Accounts page (**Tempo** > **ACCOUNTS** **more**).
- 2. Click **Reports** > **Export Timesheets reports**.

3. In the first field of the **Generate PDFs** window, select one of the following options:

- All Accounts
- The name of one account that you want to export
- An account lead, customer, or category for which you want to export all associated accounts

4. Select the **period** for which you want to export worklogs, or specify the start and end dates of a custom period.

5. Click **Generate**.

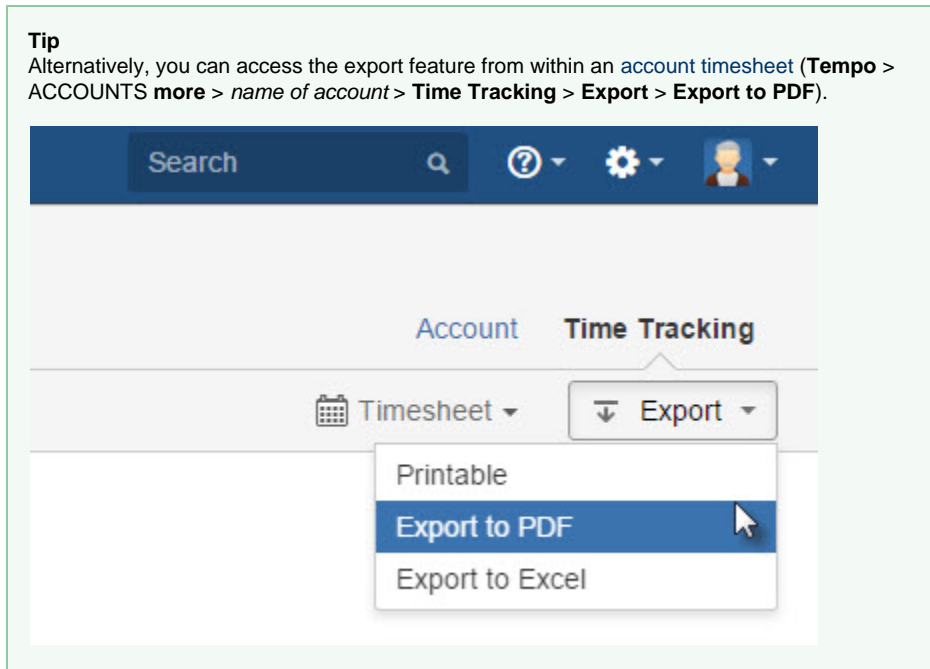

The following files are generated:

- If your selection contains only one account, a PDF file is generated.
- If your selection contains more than one account, a .zip file is generated. The .zip file contains the following files:

- A PDF file for each account that has worklogs for the period
- A single .txt file that lists accounts that do not have worklogs for the period

Tip

Alternatively, you can access the export feature from within an [account timesheet](#) (Tempo > ACCOUNTS **more** > *name of account* > **Time Tracking** > **Export** > **Export to PDF**).

[Configuring PDF worklog reports](#)

Project Timesheet

The project timesheet provides users and project managers with a quick overview of the time that is logged to, and planned for, a JIRA project. You get a snapshot of a project's progress and can view the capacity of each user.

A project timesheet, as displayed for a Tempo project manager

**Accessing the project timesheet****On this page**

- Accessing the project timesheet
- Displaying information about a version or component
- Expanding a user's information
- Reading the initial information columns
- Reading the 'total' rows
- Planning time for team members
- Viewing a team member's timesheet
- Switching among projects

Required permission

- Browse project permission
- [Tempo Project Managers](#) role (if you want to view all worklogs in the project)

In this chapter

Procedure

1. On the main menu bar, click **Tempo > Timesheets**.
2. On your user timesheet, in the upper-left corner, click **User > Project**.

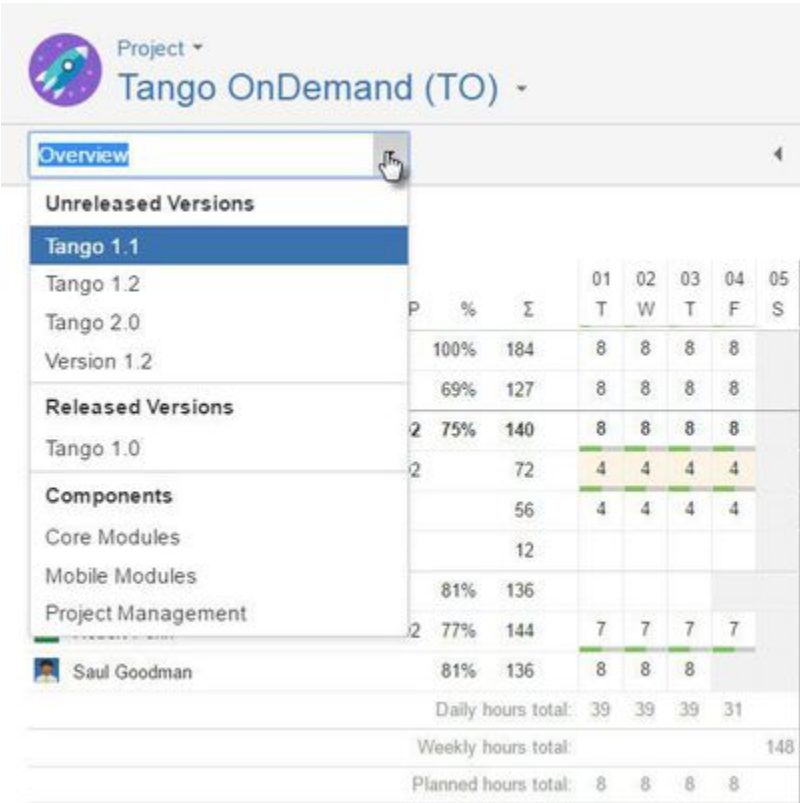

Displaying information about a version or component

You can adjust the project timesheet to display information about one version or one component of the project.

Procedure

1. On the project timesheet, in the upper-left white box, click the small down-arrow.
2. Select the version or the component that you want to display.

Figure. Selecting a version

Expanding a user's information

By default, the project timesheet displays one row for each user who logged work to the project. You can expand the information of a user to view the logged or planned time by version or component.

Procedure

To expand the information of a user, click the user's name.

Tip

You can expand the information for all users by clicking the Expand icon  above the list of users.

Reading the initial information columns

Symbol	P	%	B	
Stands for	Planned hours	Percentage of working hours logged	Billed hours	Logged hours
Explanation	The total number of planned hours in the row, in the displayed time period.	The percentage of the user's required working hours that are logged in the project, for the displayed time period.	The total number of billed hours in the row, in the displayed time period.	The total number of logged hours in the row, in the displayed time period.
Note			<p>The 'Billed hours' column is displayed if one or both of the following conditions are met:</p> <ul style="list-style-type: none"> • Users with Approve Timesheet permission can set billed hours • Team members can set billed hours 	

Reading the 'total' rows

Daily hours total	Refers to logged hours
Weekly hours total	Refers to logged hours
Planned hours total	Refers to daily planned hours

Total	Today	Period
Worked	All logged hours for the displayed period that are before or on today's date	All logged hours for the displayed period
Planned	All planned hours for the displayed period that are before or on today's date	All planned hours for the displayed period
Required	The team's required working hours for the displayed period that are before or on today's date	The team's required working hours for the displayed period

Planning time for team members

The project timesheet shows logged time. If one or both of the following conditions are met, the timesheet also shows planned time:

- Users have permission to plan time

- Time planning is enabled

Planned time is indicated by colored bars in the timesheet cells.

Related topics

Viewing a team member's timesheet

Users with Approve Timesheet permission can view the timesheets of team members. To view the timesheet of a team member, complete the following steps:

1. Hover over the team member's row. A cogwheel icon  is displayed beside the sigma (σ) column.
2. Click the cogwheel, and select **View Timesheet** from the list.

Switching among projects

Required permission

Browse Project permission for the projects

Procedure

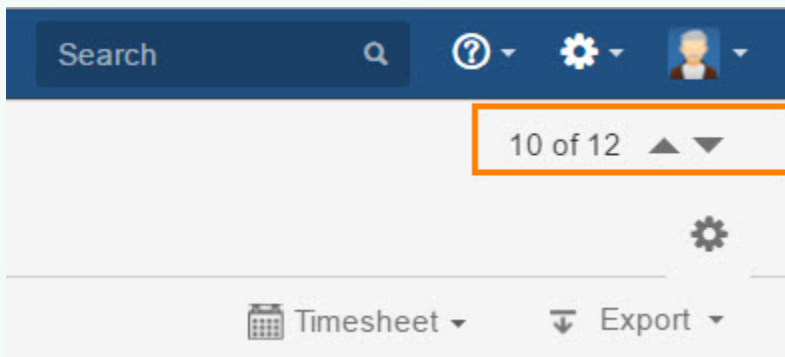

To display the timesheet of a different project, complete the following steps:

1. On the displayed project timesheet, on the second menu bar from the top, click the name of the displayed project.
2. From the list of projects, select the name of the project or search for the project that you want to display.

Tip

Alternatively, you can switch among projects by completing the following steps:

1. On the displayed project timesheet, in the upper-left white box, ensure that **Overview** is selected.
2. In the upper-right corner, click the small up-arrow or down-arrow, as indicated in the following screenshot:

If you select a version or component instead of **Overview**, the small arrows in the upper-right corner switch among versions or components instead of among projects.

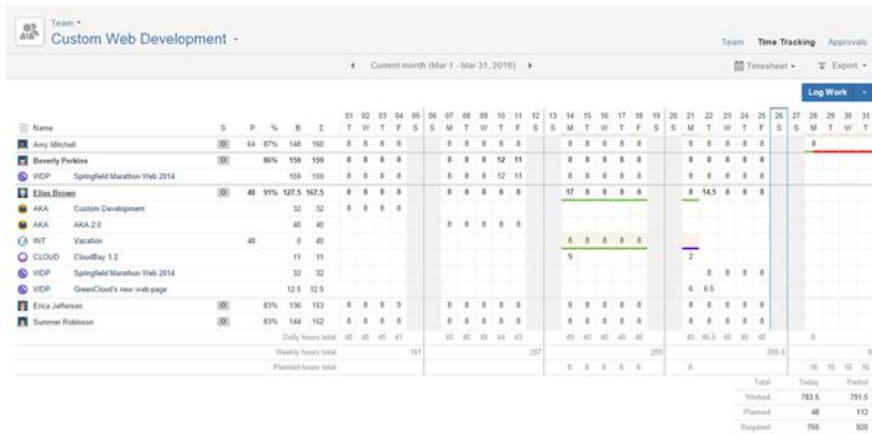

Shortcut keys: **j** = down-arrow. **k** = up-arrow.

Team Timesheet

The team timesheet provides team leads and project managers with a quick overview of the time that is logged by and planned for team members on different projects. On the team timesheet,

team leads and other users with Approve Timesheets permission can approve timesheets and plan time for team members.

Team timesheet, with the list of projects expanded for two team members (click to enlarge)

Weekly hours total:						174												245.5						232							177				230		

Procedure

1. On the main menu bar, click **Tempo > Timesheets**.
2. On your user timesheet, in the upper-left corner, click **User > Account**.

Selecting accounts to be displayed on the timesheet

1. In the upper-left corner of the account timesheet, click the name that is in big letters, underneath the word **Account**. (In the below example, the name is 'Development'.)
2. From the list, select or search for the account attribute for which you want to display accounts on the timesheet. For example, you can select or search for an account key, account name, customer, category, or account lead.

Searching for Tango accounts

Daily hours total	Refers to logged hours
Weekly hours total	Refers to logged hours

Total	Today	Period
Worked	All logged hours for the displayed period that are before or on today's date	All logged hours for the displayed period

Approving accounts

If the account approval process is enabled, team leads and other users with Approve Timesheet permission can approve the account. Once the account is approved, no worklogs on the account report for the period can be edited. To approve an account, click the cogwheel in the account row, and select **Approve** from the list.

The account approval process works only when the period is a [calendar month](#), and the available actions depend on the status of the period that is configured in Tempo period management.

- **Approve** - Disabled until the period has been closed for team members.
- **Revoke Approval** - Enabled only for approved items, if the period is open for users with Approve Timesheets permission.

A **red** dot indicates an *unapproved* account, and a **green** dot indicates an *approved* account. The approval process depends on the [Period management](#) status for team leads (or other users with the Approve Timesheet permission) and team members, but only the team leads can approve accounts.

- Reading the 'total' rows

In this chapter

Accessing the advanced timesheet

Required permission

- Browse project permission
- [Tempo Project Managers](#) role (if you want to view all worklogs in the project)

Procedure

1. On the main menu bar, click **Tempo > Timesheets**.
2. On your user timesheet, in the upper-left corner, click **User > Advanced**.

Viewing the timesheet of a different filter

1. In the upper-left corner of the advanced timesheet, click the name of the currently displayed filter.
2. From the list, select the name of the filter that you want to view.

Only the filtered JIRA issues for which work was logged are displayed.

Related topics

- [Invalid worklogs](#)

Expanding a user's information

By default, the advanced timesheet displays one row for each user who logged work to the JIRA

issues in the filter search result. You can expand the information of a user to view the logged JIRA issues.

Required permission

- [Approve Timesheet permission](#)

Procedure

To expand the information of a user, click the user's name.

Tip

You can expand the information for all users by clicking the Expand icon  above the list of users.

Switching among issues

Required permission

- Browse Project permission for the issue's project
- [Tempo Project Managers](#) role (if you want to view all worklogs in the issue)

Procedure

To display the timesheet of a different issue, complete the following steps:

1. On the issue timesheet, on the second menu bar from the top, click the big text; that is, the

- name of the displayed issue.
- From the list of issues, select or search for the issue that you want to display.

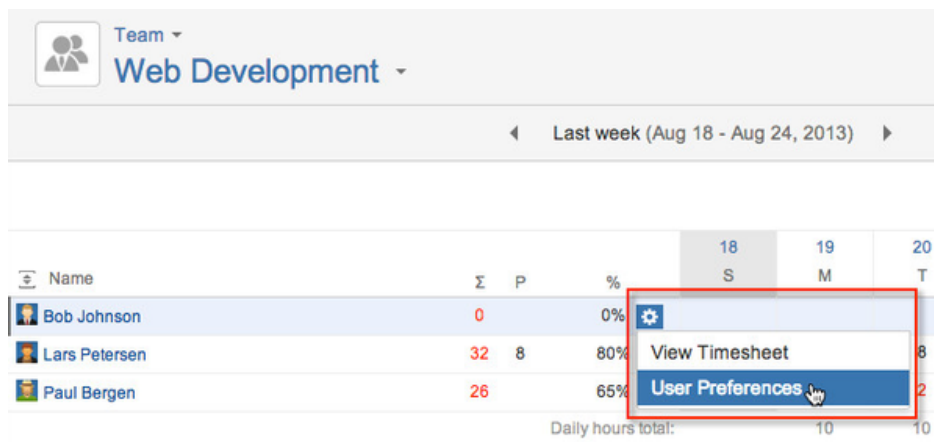

User preferences

This page explains the **User Preferences** both in the **Tools** menu on the Tempo Timesheets Navigation and in the **Actions** list for each user in the different timesheets.

User Preferences in the Tools menu on the Tempo Timesheets Navigation

User Preferences in the Actions list, for user Bob in the Team Timesheet for Team Lead Lars

Note, a user that is a **Team Lead** has the [Approve Timesheet](#) permission.

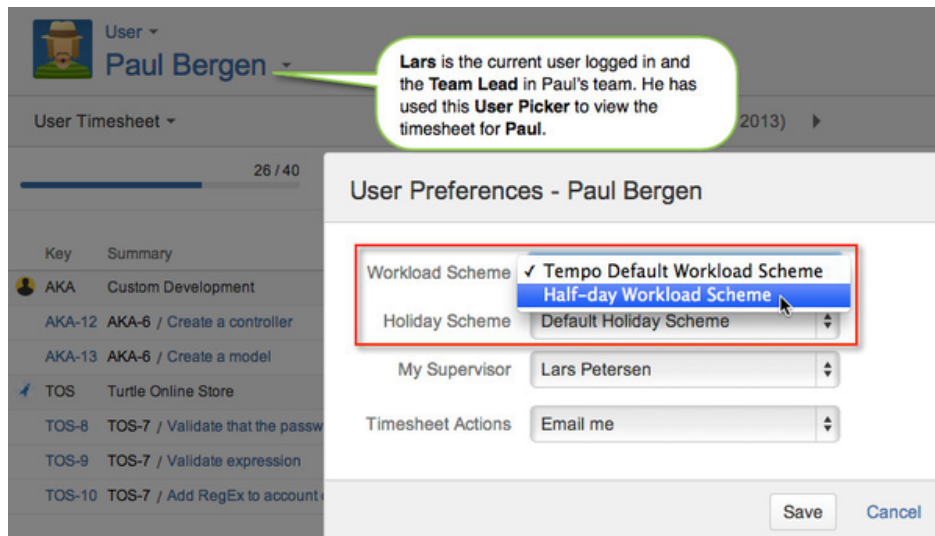

Moving Workload and Holiday Scheme Users

Users with the Approve Timesheet permission (may be the **Team Lead**), have two ways to move team members, between [workload schemes](#) and between [holiday schemes](#), through the User Preferences in timesheets. First in the [User timesheet](#) the user with the Approve Timesheet permission can use the [User Picker](#) to view the timesheet for a team member and then select the User Preferences from the Tools menu. The other way to move the users between schemes is to do so in the [Team](#) and [Advanced Timesheets](#). These timesheets display one line (in collapsed mode) for each member in the team (the Advanced Timesheet does only display members that have [Logged Work](#) on JIRA Issues in the available filters). Each user line has a cog-wheel or Actions list and by clicking on it, the User Preferences window is displayed (see screenshot above).

*Lars is moving Paul between **Workload Schemes** and he has opened the User Preferences from the Tools menu*

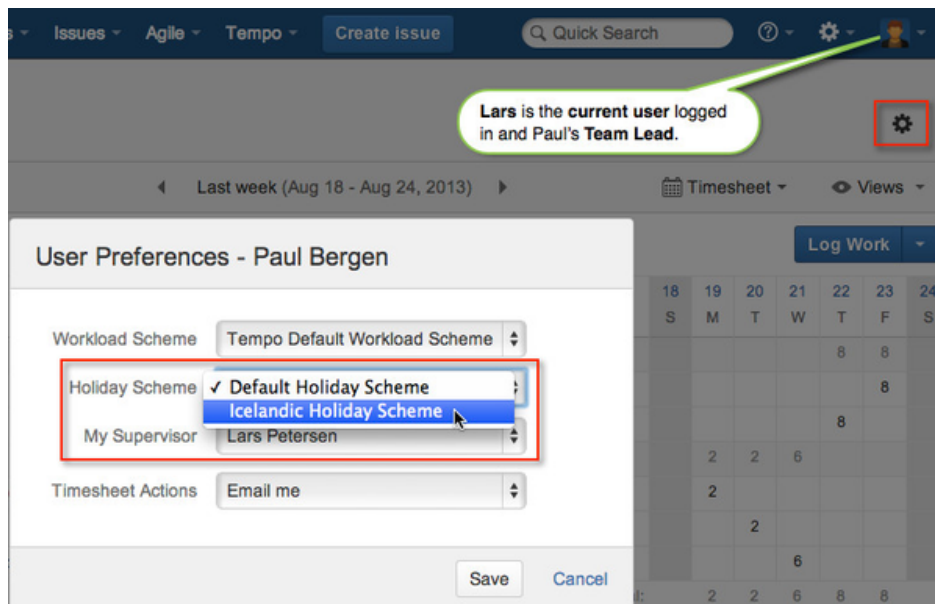

On this page

- [Moving Workload and Holiday Scheme Users](#)
- [Required Hours and Schemes](#)
- [User Preferences for Team Members](#)

Click the **Save** button to save the changes or **Cancel** link to close without saving.

Similarly Lars can move Paul between **Holiday Schemes** in the User Preferences opened from the Tools menu

Required Hours and Schemes

The [workload schemes](#) and [holiday schemes](#) are coordinated to produce joint calculations for a timesheet. The colour coding is only partially reflected by this coordination, e.g. if there is only one user displayed in a timesheet, the colour coding is shown, otherwise the coding for the default schemes is shown.

User Timesheet for Paul, showing the Workload/Holiday Schemes coordination in calculations and colouring (click to enlarge)

User  **Bob Johnson**

Bob is a part-time employee, e.g. he is required to work 8h on Wed and Thu + 4h on Sat. This means that his non-working days are coloured in light grey. The 19th of the month is a holiday and coloured in darker grey. The current day on this screenshot is the 29th and coloured light blue.

User Timesheet  August 16, 2013 - August 29, 2013  Timesheet  Views 

36 / 40

User Preferences for Team Members

Team members can only view their schemes in the User Preferences window opened through the **Tools** menu, but they can set their supervisor and if they want to get emails or not.

Bob can view in which schemes he is in, but he can set My Supervisor and Timesheet Actions

User Preferences - Bob Johnson

Workload Scheme	Part-time Workload Scheme
Holiday Scheme	Icelandic Holiday Scheme
My Supervisor	Lars Petersen
Timesheet Actions	Email me

When the Team member selects a supervisor ([Team Lead](#)) from **My Supervisor** list, it becomes displayed on this Team Leads dashboard in her/his [Activity Stream](#).

i If nothing is selected the activity will only display on the current user's dashboard.

The default value for the **Timesheet Actions** is **Email me**, but it can be changed to **Do not email me**, if you don't want to receive emails from the [Timesheet Approval Process](#) or the [Planning Approval Process](#).

i Team Leads can change these values for all team members in the Actions menu for each user in the [Team Timesheet](#).

Worklog Calendar

The *Worklog Calendar* enables users to create worklogs quickly and easily by dragging suggestions onto a calendar canvas.

Worklog Calendar

This view is available in Tempo User Timesheet where the user can get a quick overview of logged work for the dates displayed. You can toggle between the *Time View* and the *List view*. In the right section all Suggestion Cards are displayed and these cards can be dragged and dropped into the calendar canvas. The log work form is displayed on this action. A progress bar is displayed for each day showing the logged work vs. the required work for the user.

If Project colors are configured in [Project Configuration](#) the selected color is displayed in issue link.

Calendar Canvas

The default view in the Calendar Canvas is the week of current date. User can navigate by clicking the navigation buttons. Day navigation toolbar is displayed at the bottom of the page if the screen resolution is low. The *Today* button takes you back to the current date. If worklogs have been created in the selected period they are displayed as [Worklog Cards](#) on the canvas.

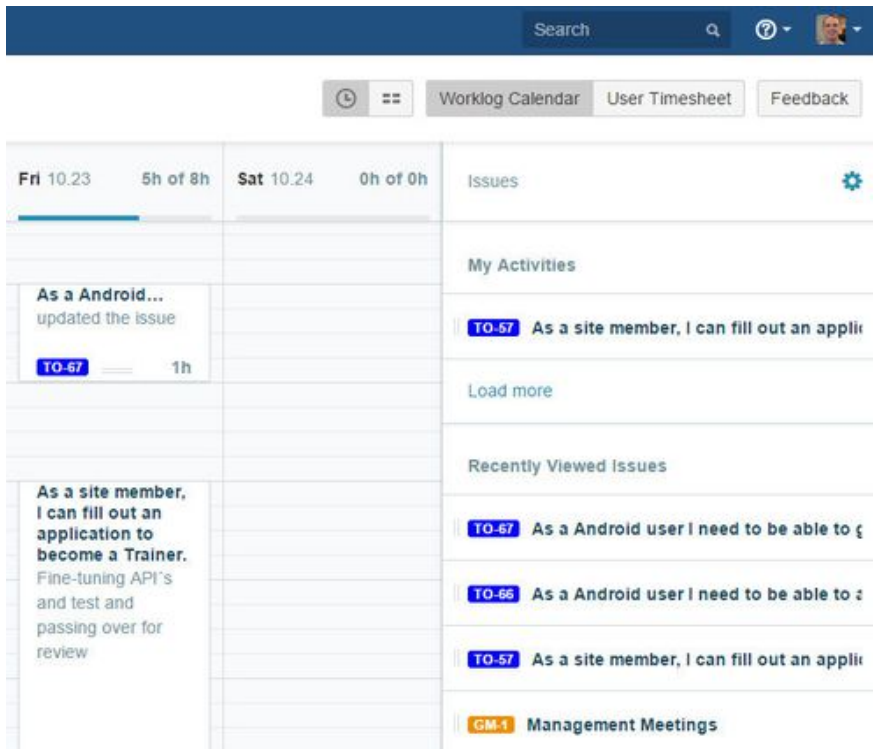

Date Navigation in Calendar Canvas

Suggestion Sections

Five [suggestion sections](#) are displayed in the right section, each showing JIRA issues from predefined jql searches. If you have JIRA Activity stream configured on your instance latest issues in the activity stream are displayed in the *My Activities* section.

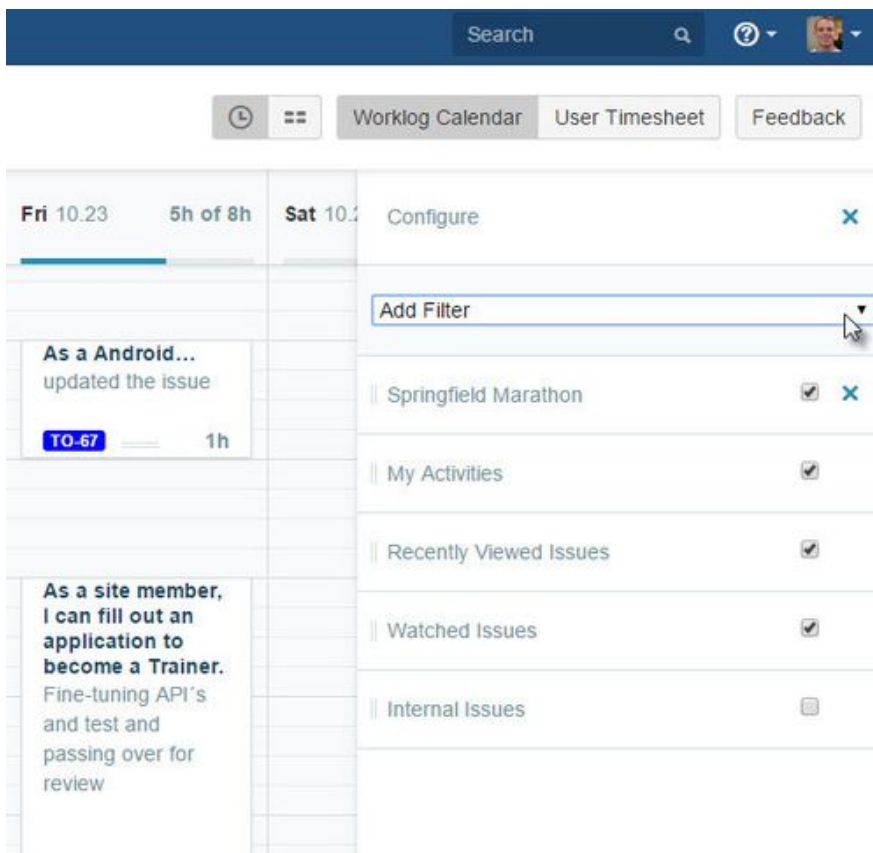

Suggestion Sections in Worklog Calendar

Users can configure which suggestion sections they see in the sidebar and how they should order them by clicking the configure button.

If the issue suggestion list is long, only a part of the list will be shown allowing the users to click a load more button to see more of the list. A JIRA filter from the users Favorite filters can be selected in the configuration mode.

Suggestion Sections in Configure mode

Log Work Form

In addition to the default fields for a worklog all [Worklog Attributes](#) configured in Tempo Timesheets are displayed in the [Log Work Form](#). This form is also validated according to the configuration in Tempo administration.

Log Work Form used in Worklog Calendar

Worklog Calendar Time View

The *Worklog Calendar Time View* is a view in Worklog Calendar. The view enables users to create worklogs quickly and easily by dragging suggestions onto a time cell on the calendar canvas. The start time field is always visible in Time View but it's visibility in List view depends on the "log work with start time" configuration in Tempo administration.

Time View

In the *Worklog Calendar Time View* you can get a quick overview of logged work for the dates displayed and visualize gaps and overlaps in your timesheet. In the right section all Suggestion Cards are displayed and these cards can be dragged and dropped to a time cell on the calendar canvas. The log work form is displayed on this action.

3. Release the mouse button and the worklog has been moved to the target date.

Copy Worklog

Steps to copy a worklog within the dates in the Calendar canvas:

1. Hover over the worklog, click the mouse button and hold it down, meanwhile press the **Ctrl** button
 ⓘ The cmd button is used on a Mac
2. Drag the selected worklog to the date you want to move to
3. Release the mouse button and the worklog has been copied to the target date.
4. Update the fields to complete your worklog if needed.
5. Click **Save** if you are done or **Cancel** to close without saving.

Using Worklog Suggestions

A user who opens the [Worklog Calendar List View](#) can see Worklog Suggestions displayed below the worklogs already submitted for the week. These suggestions can easily be changed to worklogs or dismissed if not applicable.

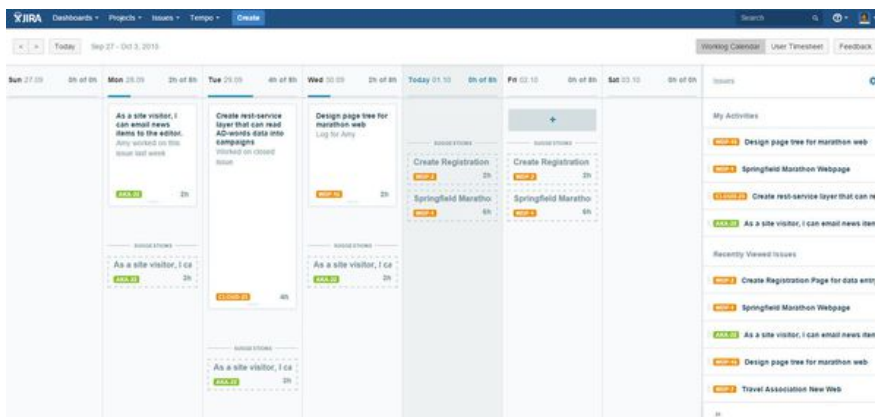

Worklog suggestions

The suggestions are displayed for the current user if the JIRA issue is assigned to the user, has time in *Remaining Estimate*, and is unresolved. In addition, the issue needs to be in the user's issue history, as the list is sorted by last viewed.

Worklog suggestions for a Tempo user displayed on the calendar - click to enlarge

On this page

- [Worklog suggestions](#)
- [Accepting a suggestion](#)
- [Deleting a suggestion](#)

In this chapter

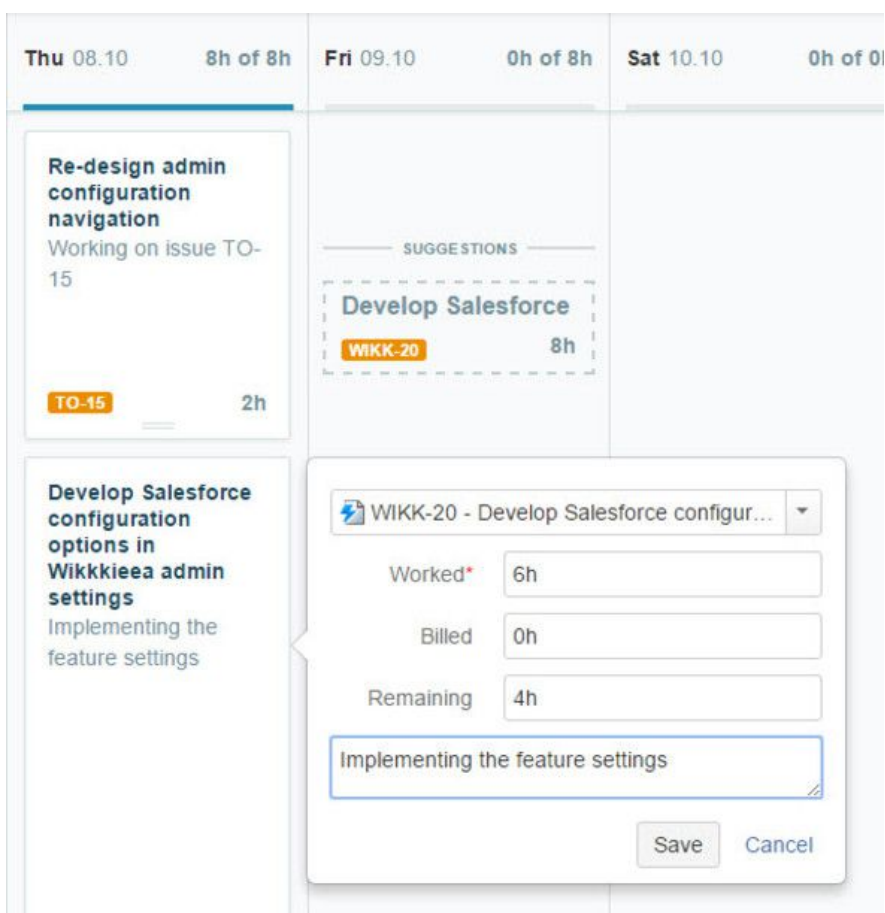

Related pages

The suggested hours and the number of suggested issues are based on the remaining workload for the day and on the issue's remaining estimate.

Accepting a suggestion

To accept a suggestion and convert it to a worklog item, click on the suggestion.

A worklog form is displayed.

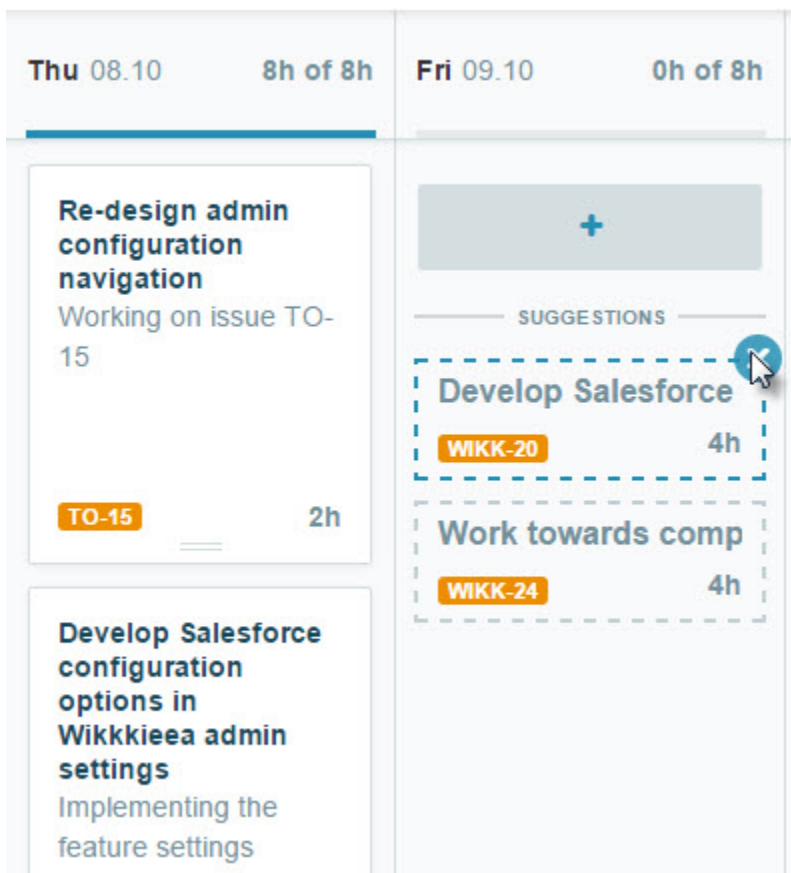

Verify the value in the fields, and optionally write a description.

Click **Save**.

Deleting a suggestion

If you do not want to accept a worklog suggestion, you can delete it by clicking the X in the top right corner of the suggestion.

Configuring Suggestion Sidebar

The suggestion sidebar is displayed on the right side of the Tempo Worklog Calendar and can be configured for each user.

Selecting suggestion sections

All suggestion sections are displayed by default, and a message is displayed if there is no search result for the user. You can select the sections to be displayed and rearrange the display by moving the sections in the configure mode, according to your needs. The state is saved to be displayed the next time you view the Worklog Calendar.

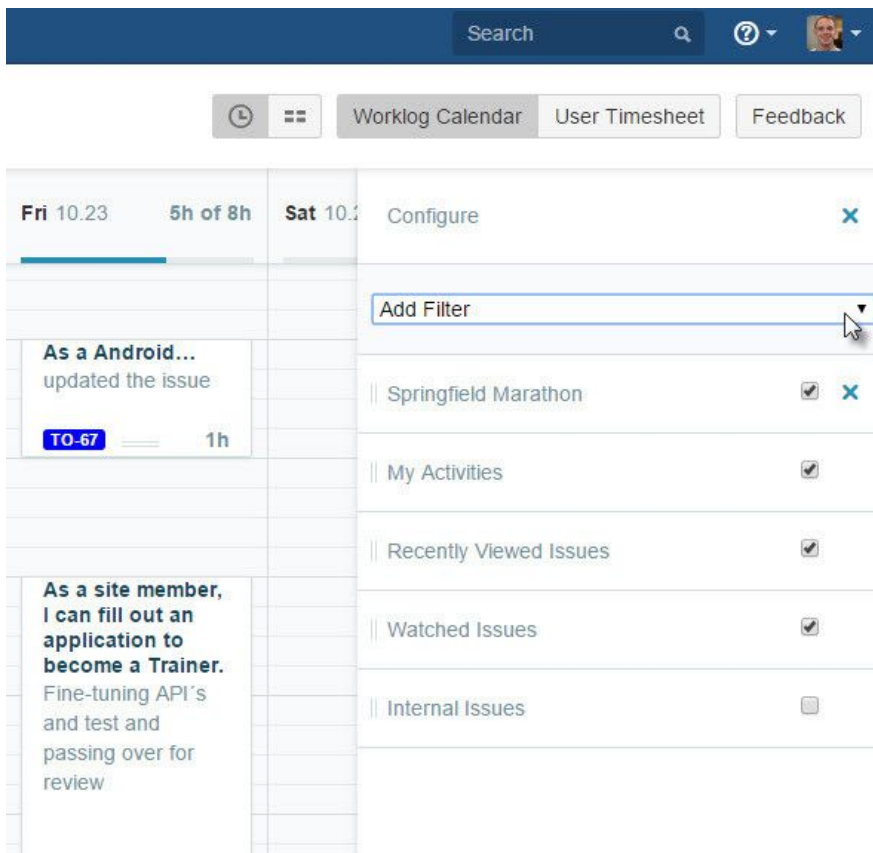

Click the cog-wheel to open the suggestion section in edit mode.

On this page

- Selecting suggestion sections
- Displaying JIRA filters

In this chapter

Related pages

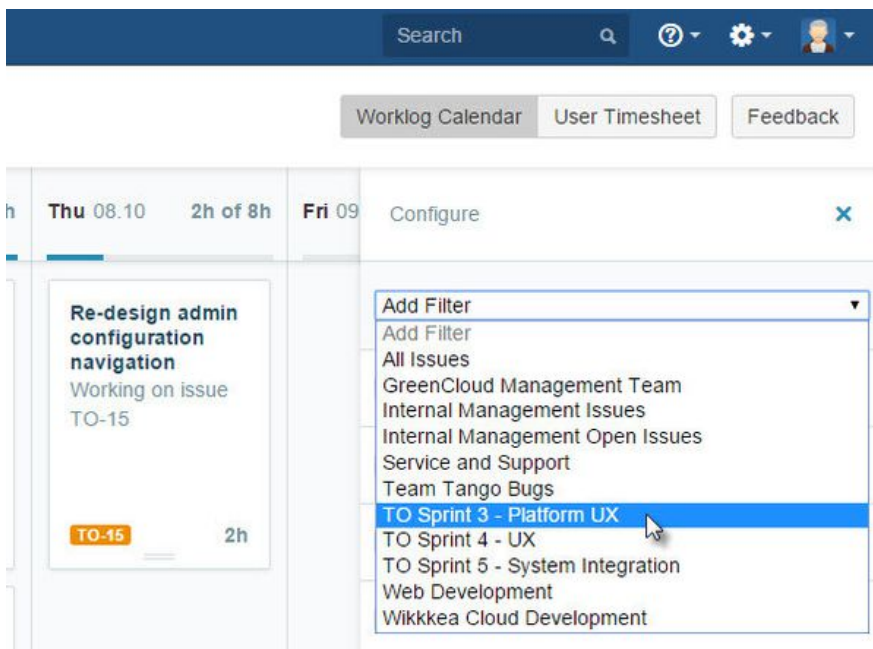

In edit mode, you can rearrange the section or hide a section if you don't want it to be displayed in the sidebar.

Displaying JIRA filters

A JIRA filter from the user's [favorite list](#) can be selected to be displayed in the Suggestion section.

Selecting a JIRA filter - click to enlarge

You can display more than one filter in the suggestion sidebar, and each filter has its own section.

i The Assigned to Me section that was displayed by default in previous versions has been removed because users can easily create that filter as a favorite.

Click the **X** in the top right section to exit Configure mode.

Viewing the user timesheet status

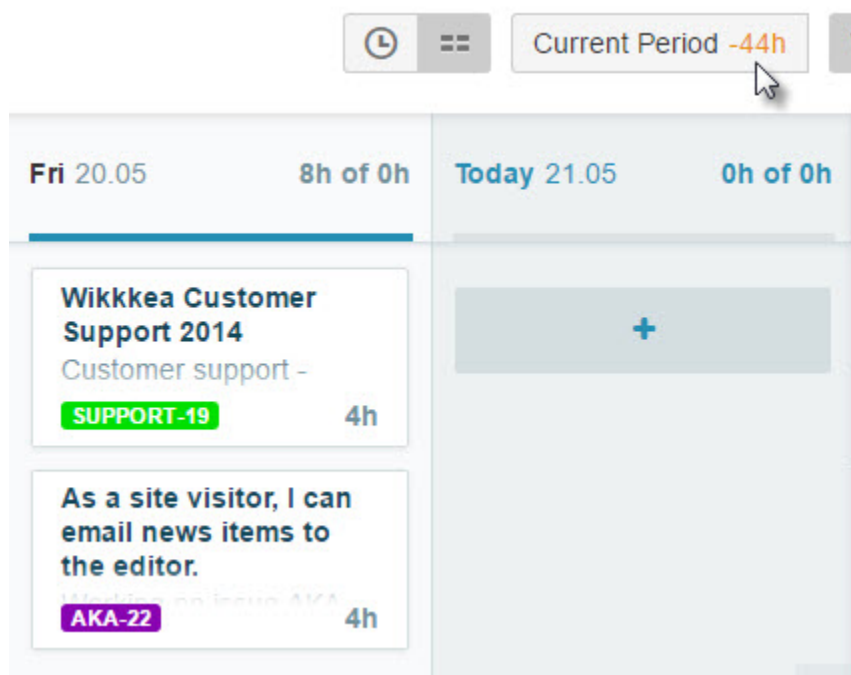

You can know how far you have progressed towards meeting your work requirements by viewing your user timesheet status. When the timesheet is ready, you can submit it for approval.

Viewing the status

Procedure

To view your user timesheet status, complete the following steps:

1. Open your worklog calendar by completing the following steps:
 - a. On the main menu bar, click **Tempo > Timesheets**.
 - b. On the second menu bar, click **Worklog Calendar**.
2. To the left of the **Worklog Calendar** button, click **Current Period**, as shown in the following image.

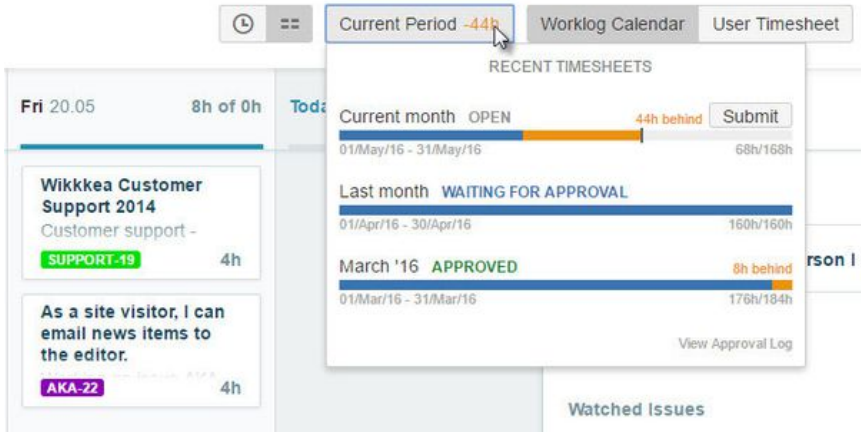

Tip

If a timesheet is waiting to be submitted, the text on the **Current Period** button changes to a message about submitting the timesheet. You can still view your timesheet status by clicking the small down-arrow on the button.

3. In the RECENT TIMESHEETS window, view the progress bars for the three most recent timesheets. The bars indicate whether the number of hours that you logged is ahead of, or behind, the required work hours.
If the timesheet approval process is enabled, the timesheet approval status is displayed above each bar.

On this page

- Viewing the status
- Submitting your timesheet for approval

Submitting your timesheet for approval

When your timesheet is ready to be submitted, the text on the **Current Period** button changes to a message about submitting the timesheet.

Procedure

To submit a timesheet for a period, complete the following steps:

- 1. In the RECENT TIMESHEETS window, above the progress bar for the period, click **Submit**.
- 2. In the 'Submit Timesheet for Review' window, fill in the requested information, and click **Submit**.

Worklogs

Worklog Permissions

Time Tracking needs to be enabled in JIRA and the user needs to have the [Work On Issues](#) JIRA permission to log work in Tempo. User who are in the [Tempo Project Manager](#) role can [view all worklogs](#) within a particular project. Users who are not in the role can only see their own worklogs. Users with [Approve Timesheet](#) permission can log work for all team members if the feature is configured in [Tempo Administration](#).

Editing Worklogs

Worklogs can be edited according to permission settings in [JIRA Project Permissions](#) if issue is editable. There are other restrictions for editing worklogs used in Tempo Timesheets and can be configured according to your needs. The features that may affect worklog editing in Tempo are [Period management](#), [Timesheet Approval Process](#) and [Tempo Scheduler](#).

Worklog Properties

A worklog logged in Tempo has the following properties

1. **Owner** - JIRA user who is signed in and logs work is the owner. Worklog owner can not be changed.
 - a. This can be the selected user if Tempo Team leader has a permission to log work for Team members.
2. **Worklog** - Date/Time and Hours worked
3. **Attributes** - Worklog description, Billed hours, Tempo Worklog Attributes

Please view the [Edit Worklogs in Tempo Timesheets](#) page for detailed information on what properties can be edited in Tempo.

Logging Work

The core function of Tempo Timesheets is to log work on JIRA issues. Tempo users can log work in Tempo with the following windows and forms.

Log Work Button

The log Work button is displayed in every [timesheet](#) view and opens the Tempo Log Work window when clicked. There are several options to find issues in the window that are documented in the [Log Work window](#) page and other pages in this chapter.

The Log Work button opens the Log Work window (click to enlarge)

Tips

Field	Tip
User	<p>In the User field, you can select a different user if the following conditions are true:</p> <ul style="list-style-type: none">• You have Approve Timesheet permission.• The option '<i>User with Approve Timesheet Permission can log work for team members</i>' is enabled in the Tempo global configuration.
Issue	<p>In the left column, you can filter the issues that are available in the Issue field. You can select Internal, Assigned, Watched or Filter.</p> <p>The left column is <i>not</i> displayed if you clicked Log Work from the <i>issue</i> timesheet because the issue is already selected.</p>

Remaining estimate	<p>The remaining estimate depends on the setting '<i>Remaining estimate is optional</i>' in the Tempo global configuration:</p> <ul style="list-style-type: none"> • If that setting is selected, and the issue does <i>not</i> have an original estimate, the remaining estimate is not calculated. • If that setting is selected, and the issue has an original estimate, the remaining estimate is reduced by the time that is logged until the remaining estimate is 0, in which case you can increase the remaining estimate. The remaining estimate cannot be a negative number.
Description	<p>A description is optional if the Worklog description is optional checkbox is selected in the Tempo global configuration.</p>
Extra fields	<p>The window might contain extra fields if Tempo worklog attributes are configured.</p>

3. If you plan to log more work immediately after you log this work, at the bottom of the window, select **Log another**.
4. Click **Log Work**.

Logging work on internal issues

You can log time that is spent on vacation or sick leave, or for general work like staff meetings, to *internal issues*. A remaining estimate is not required for internal issues.

Required permission

Depending on where you log work on an internal issue, you require different permission for the JIRA project that the issue belongs to:

- On any timesheet, you require Work On Issues permission
- On the worklog calendar, you require Browse Projects permission and Work On Issues permission

Procedure

To log work on an internal issue, from any timesheet, complete the following steps:

1. On the timesheet, in the upper-right corner, click **Log Work**.
2. In the Log Work window, in the left column, click **Internal**.

- If you plan to log more work immediately after you log this work, at the bottom of the window, select **Log another**.
- Click **Log Work**.

Issue Log Work window

The issue Log Work window is different from the Tempo Log Work window as the JIRA issue is pre-selected and the left sidebar is not displayed. This Log Work window is accessible from a

timesheet cell and from the JIRA issue view.

Timesheet Cell

Time can be logged on issues from a timesheet cell, given the issue is displayed in the timesheet, either because time has been logged on it before or because of a selected filter.

Tutorial

(Video without voiceover. Time: 0:41)

This can be done in the [User](#) and [Issue Timesheets](#). A Team Lead or a user with the [Approve Timesheet](#) permission can also log work directly on an issue in the [Advanced Timesheet](#).

To log work from a timesheet cell, click on a day for the issue you want to log work on and a Log Work window with the issue pre-selected in the issue picker is opened.

Click on a cell for an issue in the timesheet to log work (click to enlarge)

Already logged work can be [edited in-line](#) in the timesheet. The timesheet in-line window looks as in the screenshot below, where you simply click on the items you want to edit, given the period is open. You can also click the Log Work button in the in-line window to add a new worklog.

The timesheet in-line log work window (click to enlarge)

JIRA Issue View

It is also possible to log work on a specific issue in it's JIRA Issue view, along with editing worklogs, given it is within an [open period](#).

Tutorial

(Video with voiceover. Time: 0:38)

The JIRA Issue view has a Tempo panel as in the screenshot below.

The JIRA Issue view with Tempo panel (click to enlarge)

If the JIRA log work module is enabled, users can log work through it, from the **More** acti

ons list. To avoid confusion and if you are using Tempo Timesheets with it's [Log Work](#) window and worklog validations, we recommend disabling the JIRA log work module.

Viewing worklogs on a JIRA Issue screen

Details of the work that you logged to an issue are displayed on the JIRA Issue screen. You can view other users' worklogs for the issue by displaying the issue report. Worklog totals are also displayed on the JIRA Issue screen.

The Tempo section of the JIRA Issue screen

If you have Tempo Time-Tracking permission, the **Tempo** section is displayed on the JIRA Issue screen. Your worklogs for the selected period are listed, and you can navigate between periods. If you have View Worklog permission, you can view other user's worklogs by clicking one of the **Report** icons: The left icon  opens the report with worklogs sorted by user; the right icon  opens the report as a sortable table.

Logging work over a period of time

Procedure

To log work over a period of time, complete the following steps:

1. From any timesheet, in the upper-right corner, click **Log Work**.
2. In the Log Work window, select the **Period** check box so that the **End date** field is displayed.

3. Fill in the requested information, and click **Log Work**.

Work is logged for the days that are included in the period, except for weekends and public holidays.

Tip

Alternatively, you can log work over a period by completing the following steps:

1. On a user timesheet or an issue timesheet, drag the mouse over the timesheet cells that you want to log work in. In the following example, cells for four days are selected.

In this chapter

2. In the Log Work window, select the Period check box, and fill in the requested information.
3. Click **Log Work**.

Logging work with worklog attributes

It is possible to configure some additional [Worklog Attributes](#), which are displayed when logging work in Tempo Timesheets.

The Log Work window showing 3 Worklog Attributes (click to enlarge)

The first additional worklog attribute in the screenshot above is a [static select list](#) called Type.

Example of a Select List as a worklog attribute

The second attribute is where [Account](#) has been selected as a worklog attribute to make it possible to use various Tempo Accounts in one JIRA issue. The third example is **Overtime** as a checkbox.

In this chapter

Example accounts assigned to a JIRA project

Editing a work log entry

Worklogs can be edited in Tempo Timesheets if user has the required permission and the worklog is within a period that is open for editing. The [Permissions to edit worklogs](#) page lists permissions and Tempo validation for editable worklogs.

Required permission

You need the following permissions to perform the actions listed on this page:

- Edit own worklogs - [Edit Own Worklogs JIRA permission](#)
- Edit team members worklogs - [Edit All Worklogs](#) and [Approve Timesheet permission](#)
- Delete own worklogs - [Delete Own Worklogs](#)
- Delete team members worklogs - [Delete All Worklogs](#) and [Approve Timesheet permission](#)
- Move and Split own worklogs - [Delete Own Worklogs](#) and [Work On issues](#) in target project
- Move and Split team members worklogs - [Delete All Worklogs](#), [Work On issues](#) in target project and [Log work for team members](#) Tempo Permission

GMAR-6 Meeting with clients and preperation			

You cannot edit this worklog because of the following reasons:

- User timesheet is not open
- Period is closed

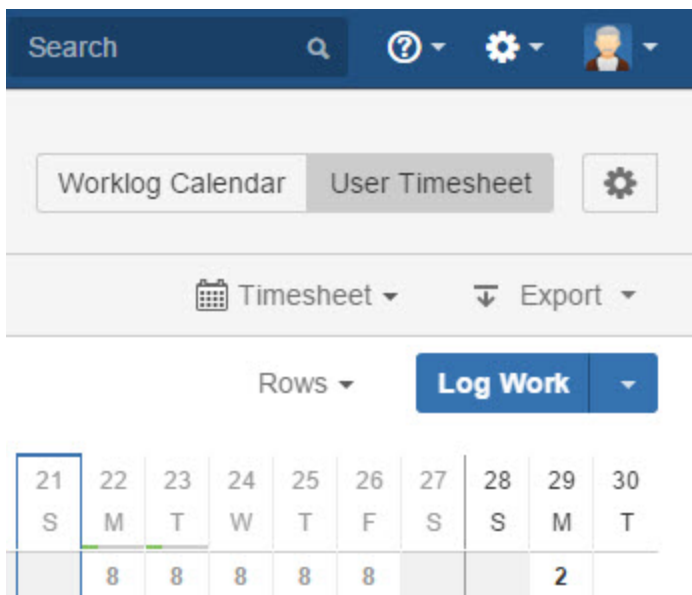

[Learn more](#)

Report Views

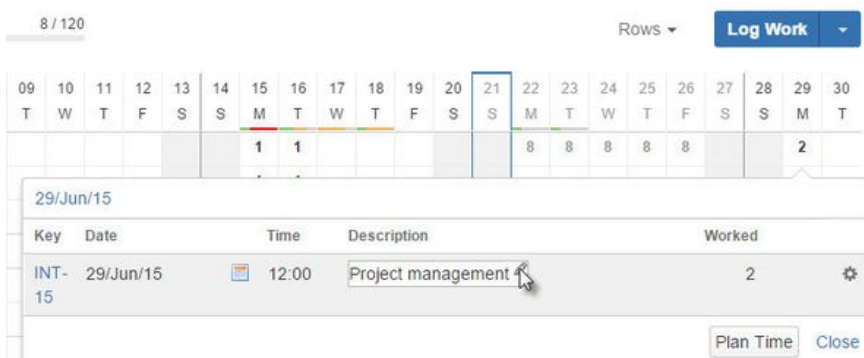

In the Tempo [Report](#) and [List](#) view you will get an overview of all worklogs that you have [permission](#) to view for the selected timesheet. Hover over the worklog and if editable the inline editing field will be displayed.

Timesheets Views

You can view by the display of date header if the Timesheet is within an editable period as the dates that are not editable are grayed out.

To edit a worklog in Timesheet view click the cell to open the Tempo In-line editing window.

Move and Split Worklogs

If a worklog is within an editable period and user has all the required permissions the options to **M**ove, **S**plit and **D**elete worklog is displayed in the worklog action list. See [Moving and splitting work log entry](#) page for more details.

Delete Worklogs

If the **Delete** option is displayed in the worklog action list the user can delete worklogs.

Editing work log entry in-line

This is a child page of [Editing a work log entry](#), explaining the In-line Edit window. This is beneficial to do corrections to previously **Logged Work**, but those corrections can also be done in the [report view](#) and [list view](#) for each timesheet.

In this chapter

Required permission

Edit Work Log permissions

Tutorial

(Video without voiceover. Time: 0:37)

The In-line Edit window varies a little bit depending on if it is opened from an **Activity** (JIRA Projects, Versions and/or Components) timesheet cell or an **Issue** timesheet cell. If it is opened from an Issue cell, the **Log Work** button is shown, but if it is opened from an Activity cell, the **Plan Time** button is shown. The **Log Work** and **Plan Time** buttons open the respective windows. The **Close** link, closes the In-line Edit window.

The In-line Edit window opened from an Issue cell - the Log Work button is displayed (click to enlarge)

The In-line Edit window opened from an Activity cell - the Plan Time button is displayed

i The Plan Time button only appears if the **Time Planning** is enabled, otherwise no button is shown.

The In-line Edit window can be opened in all timesheets except **Account timesheet**

Date, Description and Worked are the fields that can be edited in the In-line Edit window. To do the editing, hover over and click on the field you want to edit. Type in the changes and use the **Save** icon to save the changes or the **Cancel** icon to keep the original value.

The In-line Edit window

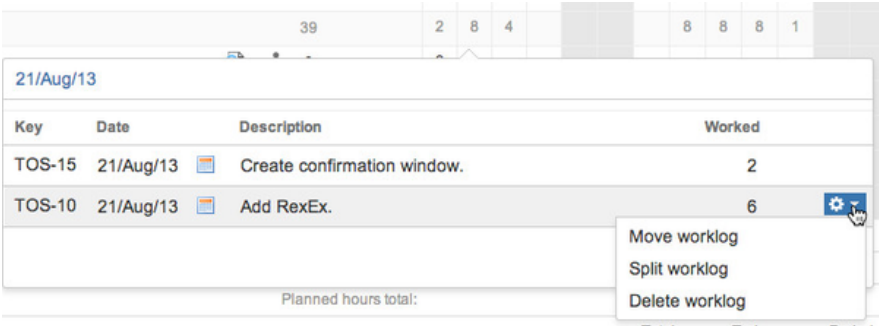

An In-line Edit window may have more than one entry, if work has been logged on more than one Issue on the same day.

i The In-line Edit window can also be opened (with multiple entries) by clicking on the day of the month (top row in the timesheet).

Each entry has three actions available in its **Actions** menu, e.g. **Move**, **Split** and **Delete** worklog.

An In-line Edit window showing two worklogs on the same day and the Actions menu for one of them

Moving and splitting work log entry

In the worklog action list you can **Move**, **Split** and **Delete** worklog if the worklog is editable.

In this chapter

Required permission

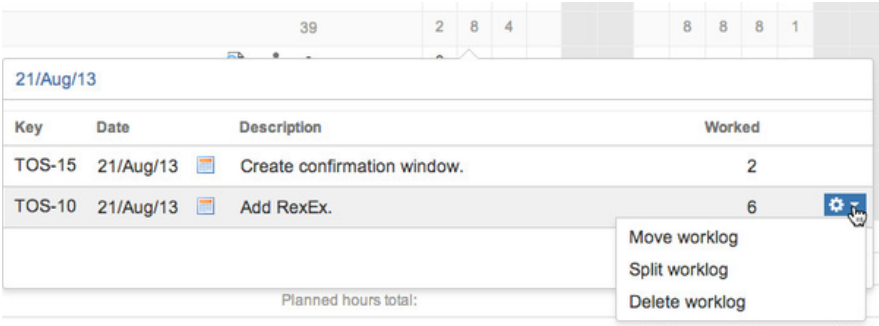

You need the following permissions to perform the actions listed on this page:

- Move and Split own worklog - [Delete Own Worklogs](#) and [Work On issues](#) in target project
- Move and Split team members worklogs - [Delete All Worklogs](#), [Work On issues](#) i n target project and [Log work for team members](#) Tempo Permission
- Delete own worklogs - [Delete Own Worklogs](#)
- Delete team members worklogs - [Delete All Worklogs](#) and [Approve Timesheet](#) permission

If you are moving a worklog that is owned by a member in your team the users needs all relevant Time Tracking JIRA permissions as listed above.

If a worklog is withing an editable period and user has all the required permissions the options to **M**ove, **S**plit and **D**elete worklog is displayed in the worklog action list.

An In-line Edit window showing two worklogs on the same day and the Actions menu for one of them

Move Worklog

Selecting the **Move worklog** action, opens the Move worklog window where you can move the worklog to another JIRA issue.

Who can edit worklogs and when

Permission to edit depends on the period management status

In this chapter

Period management status		Who can edit worklogs?	
for team member	for users with Approve Timesheet permission	Team member	Team lead ⁽¹⁾
Open	Open	(2)	
Closed	Open		
Closed	Closed		

Permission to edit depends on Tempo-scheduler closing times

Editing time	Who can edit the worklogs that are before the closing time?	
	Team member	Team lead ⁽¹⁾
Before the Tempo-scheduler closing time		
After the Tempo-scheduler closing time		
During a grace period that the team lead grants		
After the grace period		

Permission to edit depends on account approval and timesheet workflow statuses

		Who can edit worklogs?

Account approval status	Timesheet approval workflow status	Team member	Team lead ⁽¹⁾
NOT APPROVED	OPEN		
	READY TO SUBMIT		
	WAITING FOR APPROVAL		
	APPROVED		(3)
APPROVED	Any status		

(1) and other users with **Approve Timesheet** permission

(2) except for restrictions that are imposed by Tempo scheduler (see the following table)

(3) After a timesheet is approved, the team lead can edit only the worklog *attributes*; that is, worklog description, billed hours, and Tempo worklog attributes.

Time Planning

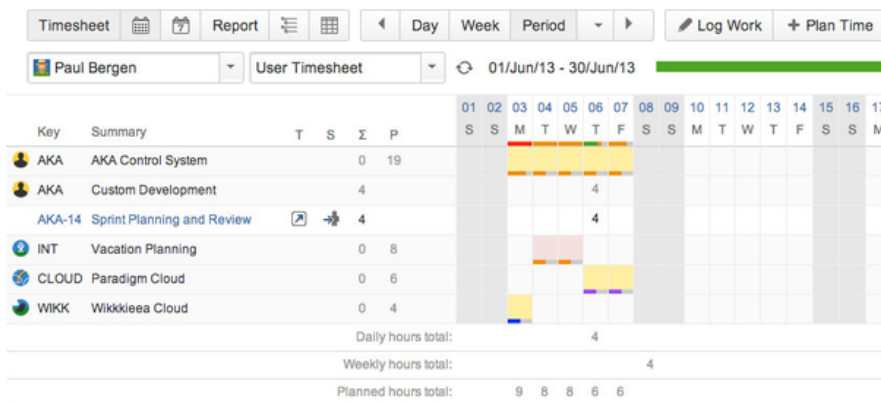

The time planning functionality makes it possible for users to do time allocations on **Issues** or **Activities**.

i **Activities** refers to a **JIRA project**, it's *version* or *component*.

Team members can either plan their own time or a user with **Approve Timesheet** permission can do it for them. The allocated time is subsequently displayed in all **timesheet** views and in **Planned Time** dashboard gadgets. The time planning feature helps both the team lead and her/his members, to get an overview of scheduled time and can aid in logging work.

Planned time is displayed with background colours and bars in timesheet grid view, shown in the screenshot below. The **User timesheet** displays planned work for each user while **Team Timesheet** shows a schedule for the entire team across multiple projects. The **Project Timesheet** gives an overview of which users are planned to work on the project in a given period, broken down by **Activity**.

Team Lead John has planned time for team member Paul

The details of the colour coding in the screenshot above is as follows:

- John has planned time on Paul in one version of the AKA project, that sums up to 19 hours.
- He has also logged 4 hours in another version of the AKA project.
- 8 hours are planned for take two half vacation days, through the INT project.
- 6 hours are planned on the CLOUD project and 4 on the WIKK project.
- The normal planning colour is **orange** for the bars and cell background is light yellow-orange.

In this chapter

Video

i Depending on how many hours are planned the length of the bar is displayed as the closest ratio to 25, 50, 75 or 100%

- Paul is over allocated on Monday 3rd of June, e.g. he is only required to work 8 hours according to his [Workload Scheme](#). This means the bar becomes **red** for this day.
- His logged hours are displayed with a **green** coloured bar.
- i** Since he has only finished 4 out of 8 required hours, the bar is only covering 50% of the cell length. Once the planned hours have been logged, only the green bar is displayed.
- The planned vacation is done on the INT project, which is an [Internal Activity](#) and the background is light red instead of light yellow-orange.
- The planning bars for the CLOUD and WIKK projects are displayed in **purple** and **blue** respectively. This means that the colours have been configured differently on the [Project Administration](#) page.

Plan Time window

This page explains the **Plan Time** window for [Time Planning](#). The window is opened by clicking the *Plan Time* button in the timesheet sub-header navigation or on any other screen where it is present.

The Plan Time button in the timesheet sub-header navigation (click to enlarge)

The Plan Time window has an orange header to differentiate it from the [Log Work](#) window. The left sidebar has default the options *Issue* and activities *Project*, *Version* and *Component*. If an [Internal Activity](#) has been configured the *Internal* tab becomes available.

Plan on Issue

The first option for planning is Issue where you can plan time on a JIRA issue. The *User* field is a *User Picker* for users with [Approve Timesheet](#) permission using this plan time function.

The Plan Time window showing the Issue option in the side menu (click to enlarge)

 A screenshot of the 'Plan Time' window. It has an orange header with the text 'Plan Time'. On the left is a sidebar with five options: 'Issue' (selected), 'Project', 'Version', 'Component', and 'Internal'. The main area contains several fields: 'User' (Paul Bergen), 'Issue' (a dropdown menu showing 'SUPPORT-1 - We have lost all connection t...'), 'Period' (a checkbox), 'Date' (21/May/13 with a calendar icon), 'Availability' (8h), 'Working days' (1d), 'Remaining estimate' (0h), and 'Original estimate' (7h). There is a 'Planned' input field and a 'Description' text area. At the bottom, there are three buttons: 'Plan another' (disabled), 'Plan Time', and 'Cancel'.

To plan time on an issue, follow the steps below:

1. Once you have opened the window, select the **Issue** option on the left sidebar.
- i** The last option that was used, is selected by default.
2. Choose an issue from the drop-down in the **Issue** field (you can also start writing).
3. If you tick the **Period** box, an **End date** field for the time period is displayed.

On this page

- [Plan on Issue](#)
- [Issue Planning from Action list](#)
- [Other Options](#)

In this chapter

- Select a new **Date** (and **End date**) if you are planning on another date than the current one.
 - Availability (Working days)** is displayed below the date in the window. These numbers reflect the users [workload schemes](#) and [holiday schemes](#), and if some plans have been done previously on her/him for the date.
- Fill a number into the field **Planned** for the hours to be planned on the issue (if period is chosen, the field is called **Plan per day**).
 - Remaining estimate** and **Original estimate** are displayed above for information purposes only, e.g. it doesn't make sense to plan more than the original estimate indicates.
- Write a brief description in the **Description** field.
 - The description is optional and can therefore be omitted.
- Click the **Plan Time** button if you are done planning or **Cancel** to close without saving. You can also continue to plan, by ticking the **Plan another** box before you click the **Plan Time** button, but this means that the window stays open to do a new plan time entry.

Issue Planning from Action list

The plan time window can be opened from the [User timesheet](#), by selecting the **Plan Time** option in the **Actions** list for an issue in the timesheet.

The Plan Time options in the Actions menu for the AKA-20 issue in the user timesheet

Timesheet Cell Planning

This page explains how the *Plan Time* functionality works by clicking on cell(s) in all *Timesheets* except Account Timesheet. The screenshot examples below are mostly taken from the *User timesheet*, where *Team Lead* (or a user with *Approve Timesheet* permission) John is logged in, but team member Paul is displayed. In order to do user timesheet cell planning, the Activities options needs to be ticked in the *Rows* menu

i **Activities** refers to a *JIRA project*, it's version or component. These same options are available in the general *Plan Time* window, along with issue in it's left side menu, e.g. time can be planned on those different items - see bottom of page.

Timesheet Calendar View

This page explains the [Timesheet](#) calendar view for Time Planning. It is a useful view in regards to time planning, given the [Planning Options](#) are set to it's default value. This view displays time planning information for the [User](#), [Project](#), [Team](#) and [Issue](#) Timesheets.

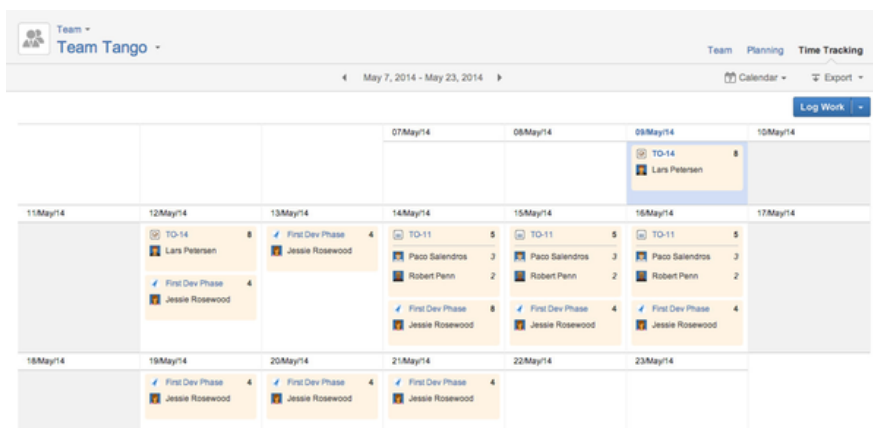

In this chapter

The timesheet calendar view option in the timesheet navigation

The team timesheet in the screenshot above shows some planned times and a few logged hours. Only the planned hours will be displayed in the calendar view.

The Team Timesheet in calendar view

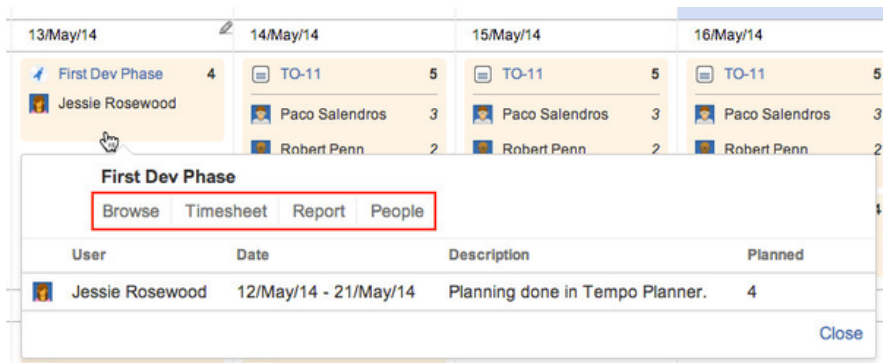

As can be seen on the screenshots above and below, the planned items are framed with a light orange background. Clicking somewhere within this background, opens an **in-line editing window**,

see the screenshot below.

i The planned entries in the in-line editing window have an action menu to the right in the line from where you can **Edit**, **Delete** or [Request Approval](#) for a plan.

The in-line editing window in timesheet calendar view

In the screenshot above, several links are shown in a red-framed box. These links are different, depending on if the plan is done on an **Issue** or an **Activity**. The links are explained in the table below.

i **Activities** refers to a [JIRA project](#), it's *version* or *component*.

Table: In-line editing window links explained

Issue	Activity	Description
View Issue	N/A	This link takes you to the JIRA Issue page for the particular issue.
Log Work	N/A	Opens the Log Work window to log work on the particular issue.
Report	N/A	Takes you to the tabular report view of the Issue Timesheet .
N/A	Browse	This link takes you to the JIRA summary page for the activity in question.
N/A	Timesheet	Clicking this link, opens the Project Timesheet with it's item pickers set to the activity in question.
N/A	Report	Takes you to the Project Report View of the Project Timesheet for the activity in question.
N/A	People	Opens the Tempo People tab for the activity in question.

It is also possible to plan time from a cell in the calendar view. Click on one of these options, e.g. the white part of a cell (not the planned part), the link for the day or a pencil icon to the right of the date.

Click on the date or the pencil to open the Plan Time window

14/May/14	15/May/14	16/May/14
<div>TO-11</div> <div><div>Paco Salendros3</div><div>Robert Penn2</div></div> <div><div>First Dev Phase8</div><div>Jessie Rosewood</div></div>	<div>14. Issue Collaborators

If the [Planning Options](#) are set to it's default value, a right panel called **Collaborators** is displayed in the JIRA issue.

Collaborators panel in JIRA issue view

Paul Bergen is the only user that has logged work on this issue. All users who **track time** or are **planned** on an issue are added to the **Collaborators** list. These users are displayed with a status bar where worked vs planned time are shown in **green** vs **orange** colours respectively. The screenshot above shows this also as 3 worked hours out of 8 planned hours.

The plan time window can also be opened by clicking on the + to the right of collaborators.

Open the Plan Time window from collaborators

The collaborators list can be expanded and collapsed.

Expand and collapse the collaborators list

By default only own data is displayed but if the user is in the [Project Manager Role](#) for the project, worklogs of other users will be displayed

Planning Approval Process

Request Approval

This page explains the **Request Approval** workflow process for [planned time](#). In order for this approval process to work, it needs to be set in [Tempo Global Configuration](#).

The Labs' Plan Workflow option in the Global Configuration

Labs (Experimental Features)

- ☒ Enable Account PDF Export - (Not available for Global Accounts, yet)
- ☒ Plan Workflow - Allows plans to be submitted for a supervisor's review. Unless disabled, notification emails are sent on any workflow actions
- ☒ Agile Timesheet - See all worklogs associated with JIRA Agile boards and sprints. Currently only available for users with JIRA Agile installed.

When this option is enabled, a user can request a plan s/he has made to be approved or rejected by a reviewer (*Team Lead* or a user with [Approve Timesheet](#) permission). The screenshot below shows a **Reviewer** being selected in the [Plan Time window](#) and the text entered in the **Description** field becomes a message to the reviewer.

 User can not select own name as reviewer.

If only one user has Approve Timesheet permission nothing is displayed in the reviewer list for that user.

Selecting a Reviewer for a planned issue (click to enlarge)

 A screenshot of the 'Plan Time' window. The window has an orange header. On the left is a sidebar with links: Issue, Project, Version, Component, and Internal. The main area contains form fields: User (Paul Bergen), Issue (a dropdown menu), Period (checkbox), Date (07/Jun/13), Availability (8h), Working days (1d), Remaining estimate (0h), Original estimate (32h), Planned (8), and Description (Enable DDR3.). At the bottom, there is a 'Reviewer' dropdown menu that is open, showing a list of names: 'No reviewer selected', 'Laura Penn', 'Lars Petersen', 'John Steel' (highlighted), and 'Erica Jefferson'. At the bottom right are 'Plan Time' and 'Cancel' buttons.

In this chapter

If Paul and John have configured the [Tempo activity stream provider](#), this activity will be displayed in their dashboards.

The **Reviewer** can also be selected from the in-line edit window. Clicking on the planned [Timesheet Cell](#) and choose the **Request Approval** action option, which opens the *Request Approval* window to select the reviewer.

The statues for planned items are displayed with different background colours in the [Timesheet](#) cells. [Planned items](#) that do not have any statuses yet are displayed with **orange** bars at the bottom in the timesheet cells.

When a reviewer has been selected the background colour becomes **light yellow-orange** for the planned item. Once the item has been approved, the background colour changes to **green**. Other statues are shown in the table and screenshot below.

Table: Statues for planned items

Background colour	Status of a Planned Item
None	A reviewer has not been selected
Light yellow-orange	Pending Manager
Green	Approved
Dark orange	Rejected
Blue	More than one statuses for the selected item

Statues for planned items shown in the Team Timesheet

Key	Date	Description	Planned	Plan Status
AKA-15	27/May/13	Styling for the AKA team.	2	Pending manager
AKA-9	27/May/13	Help Dave to create a model.	2	Rejected

Shared Planning Data

As of **Tempo Planner 1.2** and **Tempo Timesheets 7.9**, planning data is shared between these two products. This is given the plan items are supported in each product:

Tempo Timesheets can only handle JIRA Issues and Activities (JIRA Project and it's Versions or Components).

- This means that planned Epics, Sprints and plans on Kanban boards in Tempo Planner are not displayed in Tempo Timesheets.
- Items planned on teams or recurring plan items in Tempo Planner, are also not supported in Tempo Timesheets.

Tempo Planner can handle all plan items from Tempo Timesheets except Internal Issues.

- Plan items done in a different scope from the current one in Tempo Planner, are shown transparent.
- For example items done in another team or in Tempo Timesheets.

Planning data shown in Tempo Timesheets - Team Timesheet Calendar View (click to enlarge)

User	Date	Description	Planned
Jessie Rosewood	12/May/14 - 21/May/14	Planning done in Tempo Planner.	4
Jessie Rosewood	14/May/14	Planning done in Tempo Timesheets.	4

i The description shown in the in-line dialog, is the one given when the item was planned, either in Tempo Planner or Tempo Timesheets.

Plan items that are only available in Tempo Planner like Sprint planning are

not displayed in Tempo Timesheets

Timesheet Approval Process

Tutorial

Timesheet approvals

Workflow Statuses

In order for the [User timesheet](#) approval process to work, your JIRA administrator needs to select *Enable Timesheet Approval Process* in [Global Configuration](#), by either choosing to do so on **Weekly** or **Monthly (Period)** basis.

Required permission

Approve Timesheet Tempo Team permission

Once enabled, a button called **Get Approval** and a workflow status appear in the sub-header area of the timesheet. If enabled as Weekly, the [Date navigation](#) has to be set as **Week** and the same applies if enabled as Monthly (Period), the Date Navigation has to be set as **Month**.

User Timesheet where 'timesheet approval process' is set to Weekly

Note, if the [Date navigation](#) is set to another value than the approval process, a link will be shown as in the screenshot below.

Message - Return to current approval period

Table: Describes the different Workflow statues in the Timesheet Approval Process

Status	Who can edit worklogs?	Description
Current week OPEN Get Approval	All users	The chosen period (set as Weekly or Monthly) is not finished or the required workload has not been completed (work has not been logged as expected).

On this page
<ul style="list-style-type: none">• Tutorial• Workflow• Statuses• Required permission• Get Approval• Approve Timesheet
In this chapter

	All users	<p>The required workload has been completed (work has been logged as expected) and/or the period is finished.</p> <p> This is also the status for Rejected timesheets.</p>
	Only users with Approve Timesheet permission for the team.	The user has clicked the Get Approval button and sent the timesheet for approval.
	Worklogs not editable	<p>The Timesheet has been approved by a Reviewer, a user with the Approve Timesheet permission for the team.</p> <p> Note, the Timesheet Approval report with a better overview of approval statuses for team members.</p>

Get Approval

The **Get Approval** button is active in Workflow statuses, *Open* and *Ready to submit*. When the user clicks the button on the User Timesheet, a confirmation window is displayed, where the user can verify the dates and the total sums.

 If the Workflow is not in status *Ready to submit*, a warning message is displayed:

 **This timesheet is not complete. Are you sure you want to submit it?**

In the Get Approval confirmation window, a **Reviewer** needs to be selected, given there are many to choose from.

 A **Reviewer** is a user that has the [Approve Timesheet](#) permission for the team. If the user can select from more than one reviewers, s/he can set a default Reviewer (My Supervisor) in [User preferences](#).

Selecting a Reviewer in the confirmation window

Get Approval - Paco Salendros

User: **Paco Salendros (paco)**

Date to: **16/Nov/13**
Worked: **40**
Required: **40**
Comment:

Get Approval Cancel

Click the **Get Approval** button in the Get Approval confirmation window and the window closes with the Workflow status changing to *Waiting for approval* in the User Timesheet. In the *Waiting for approval* state, the period (either configured as Weekly or Monthly) is now closed for adding and/or editing worklogs. Closed periods are displayed greyed out in the User Timesheet.

The Workflow status is 'Waiting for approval' and the timesheet is greyed out

The period in the User Timesheet has now been sent off to a **Reviewer** and s/he can either **Approve** or **Reject** it from the action list in the Team Timesheet.

Once a period on a User Timesheet has been Approved, it is no longer editable.

Approve Timesheet

The Get Approval button has now changed to a drop-down called **Workflow** for the **Reviewer**, which has the options to **Approve Timesheet** or **Reject Timesheet**.

Workflow actions for Reviewer Robert

The Workflow actions can also be accessed from the **Team Timesheet** for each team member in the Actions list (see screenshot below) and through the [Timesheet Approval report](#) in Tempo Teams.

i Other actions in the Actions list are View Timesheet, [Approval Log](#), [Grace Period](#) (given the [Tempo Scheduler](#) has been enabled) and [User preferences](#).

The Actions list a Reviewer sees for a team member in the Team Timesheet

There is also the case where a user, that has the [Approve Timesheet](#) permission (for example Robert) approves his own User Timesheet, e.g. chooses himself as a reviewer in the Get Approval window.

A few statements/an example to clarify this point:

- An activity is added to Robert's dashboard and an email is sent if the default option is enabled in [User preferences](#).
- Robert can **Approve** and **Reject** his own timesheet from his [User timesheet](#).
- He can **not** Approve/Reject his own timesheet from the [Team Timesheet](#) - the options are not available in his user action list.
- All other users with the [Approve Timesheet](#) permission for the team he is in, can Approve Robert's timesheet both from his User Timesheet and his user actions list in other timesheets.

Notifications for Approval Process

This page describes the workflow notifications, that are part of the [Timesheet Approval Process](#) and how they appear in the [Activity Stream](#).

The team member **Paco Salendros** has completed the weeks required work and sends his timesheet to **Robert Penn** for approval.

Paco Salendros is sending an approval request to Reviewer Robert Penn

[View Timesheet](#)

Timesheet Approval report

The **Timesheet Approvals** report and the **Approval Log** are part of the [Timesheet Approval Process](#). The Timesheet Approvals report gives an overview of the approval status of team members for a given month, and the Approval Log gives an overview for one team member over a year.

Required permission

[Approve Timesheet](#) Tempo Team permissions

Timesheet approvals

The Timesheet Approvals Report is accessed from [Tempo Teams](#) through the **Approvals** link that is displayed on the page and on Team Timesheet

The data in the report is taken entirely from Tempo Timesheets, and the report is therefore displayed only if it is installed and the *Enable timesheet approval process* in [Global Configuration](#) is selected.

The Timesheet Approvals Report (click to enlarge)

JIRA

<

On this page

- Required permission
- Timesheet approvals
- Approval log

In this chapter

The Timesheet Approvals report shows the approval *Status* for each *Team Member*, *Hours* (logged/required). A "Last transaction" column shows the *Comment* and *Reviewer* as entered in the [Get Approval](#) window.

The reviewer can perform actions on multiple timesheets, as documented on the [Approving multiple timesheets](#) page.

Note that the user who performed the action may be the reviewer, if the reviewer performed the action on behalf of the team member.

The team member list can be filtered through the Status drop-down to the left above it. Next to the Status filter is a date navigation box, to navigate between set periods. The Actions cog wheel has different actions available, depending on the current status for each team member. The actions for each status are the same as in the Team Timesheet and as explained on the [Timesheet Approval Process](#) page. A summary of the actions is given in the table below.

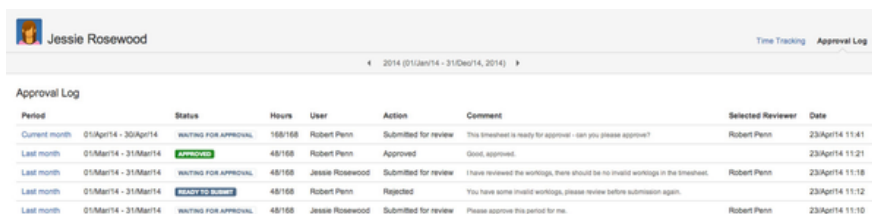

*Table: A summary of actions for each timesheet status - the actions in **bold** are the ones that vary between different types of status*

Status	Available Actions
Open or Ready to submit	View Timesheet (User timesheet), Get Approval , Approval Log, Grace Period , User preferences
Waiting for approval	View Timesheet, Approve Timesheet , Reject Timesheet , Approval Log, Grace Period , User Preferences
Approved	View Timesheet, Reopen Timesheet , Approval Log, Grace Period , User Preferences

Approval log

Clicking the Approval Log option for a team member in the actions cog wheel list opens a summary of all approval communications for this member over the current year.

The Approval Log for Jessie Rosewood

Period	Status	Hours	User	Action	Comment	Selected Reviewer	Date
Current month: 01-Apr-14 - 30-Apr-14	WAITING FOR APPROVAL	158/168	Robert Penn	Submitted for review	This timesheet is ready for approval - can you please approve?	Robert Penn	23-Apr-14 11:41
Last month: 01-Mar-14 - 31-Mar-14	APPROVED	48/168	Robert Penn	Approved	Good, approved.		23-Apr-14 11:21
Last month: 01-Mar-14 - 31-Mar-14	WAITING FOR APPROVAL	48/168	Jessie Rosewood	Submitted for review	I have reviewed the workings, there should be no invalid workings in the timesheet.	Robert Penn	23-Apr-14 11:18
Last month: 01-Mar-14 - 31-Mar-14	GRACE TO REVIEW	48/168	Robert Penn	Rejected	You have some invalid workings, please review before submission again.		23-Apr-14 11:12
Last month: 01-Mar-14 - 31-Mar-14	WAITING FOR APPROVAL	48/168	Jessie Rosewood	Submitted for review	Please approve this period for me.	Robert Penn	23-Apr-14 11:10

Each line in the Approval Log shows the *Period* to which the data relates, and there is a link to the corresponding date range in the User Timesheet. Also shown are the *Status*, *Hours* (logged/required), *User* (who changed the status), which *Action* was performed, the *Comment* as entered through the [Get Approval](#) window, the *Selected Reviewer*, and the *Date* on which the action was performed.

Note that the user registered for the action may be the same as the Selected Reviewer if the reviewer performed the action on behalf of the team member, as is the case for the first line in the Approval Log screenshot.

The date range can be changed above the log in the sub-header - click on the arrows to each side to change the year. The [Time Tracking](#) link to the right in the header opens the corresponding User Timesheet for the current month.

Approving multiple timesheets

This page explains the **Timesheet Approvals** report, which is part of the [Timesheet Approval Process](#). The Timesheet Approvals report provides an overview of the approval status for all team members, grouped by status within the selected period.

Required permission

Approve Timesheet Tempo Team permission

Timesheet approvals

The Approvals link is displayed in the header of the Team Timesheet. This link opens the Approval Report for the period, in a weekly or monthly view, depending on the Global Configuration.

Timesheet Approvals for team members, grouped by status - click to enlarge

Team Member	Status	Last transaction	Hours	Actions
Waiting for approval				
Gregory Nolan	WAITING FOR APPROVAL	05/Oct/15 9:47 am Reviewer: Robert Penn	33 83%	Approve (2) Reject (2)
Robert Penn	WAITING FOR APPROVAL	05/Oct/15 10:42 am My timesheet is completed for this week Reviewer: John Steel	45 113%	Approve Reject
3 Timesheets are Ready to submit				
Submit (3)				
Team Member Status Last transaction Hours Actions				
Jessie Rosewood	READY TO SUBMIT		40 100%	Submit
Lars Petersen	READY TO SUBMIT		36 90%	Submit
Saul Goodman	READY TO SUBMIT		48 120%	Submit

Only users with Approve Timesheet permission for the team can see the Approvals link and perform actions on the timesheets that are listed.

Multiple approvals

Timesheets for all users in the team are displayed, grouped by Status, with Waiting for Approval displayed at the top and Approved timesheets displayed at the bottom of the page. You can select a status to be displayed in the filter option on the left side of the header.

Reviewer approving timesheets for 3 team members

Team Member	Worked / Required
Gregory Nolan	33 / 40
Jessie Rosewood	40.15 / 40
Lars Petersen	36 / 40

To perform actions on multiple timesheets, select the check boxes at the beginning of the rows. You can quickly select all users that have the same status by selecting the check box above the list of users.

Actions

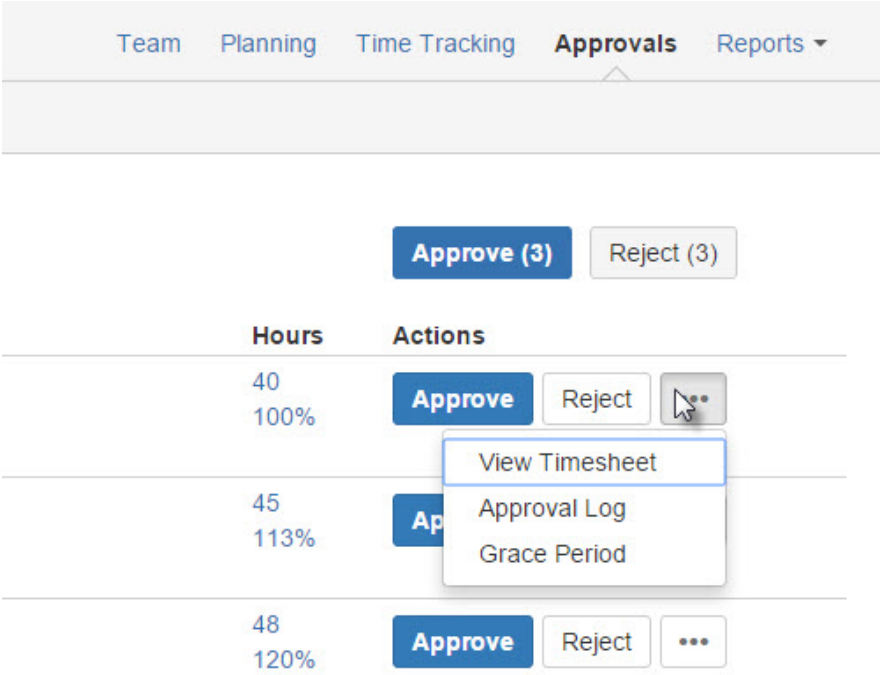

To see more actions, click the three dots. Possible actions include viewing the timesheet and the Approval Log, and specifying a Grace Period (if the Tempo Scheduler has been enabled).

Getting Started

All JIRA users that have the [Tempo Time Tracking](#) permission can use **Tempo Timesheets**. The **Tempo** drop-down menu becomes available in the *JIRA Top Navigation Bar* for these users.

Getting Started option in Tempo Top navigation (click to enlarge)

In this chapter

Select the **Getting Started** from the drop-down menu, to view tips on configuring and customising Tempo Timesheets, as well as a summary of some of the key features. To be able to use it's basic function, e.g. [Log Work](#), the user needs to have the **Work On Issues** permission for the JIRA projects, that the issues belong to. The **Browse Projects** permission is also needed for all JIRA Issues, except if the [Internal Issues](#) have been configured on your installation. (The **Internal Issues** are used to avoid that users see each others log entries for **Vacation**, **Sick Days** etc. The issues configured this way, show up as the option [Internal](#) in the **Log Work** window.) On the worklog calendar, **Browse Projects** permission is required even for internal issues.

Note! A relevant excerpt from the JIRA documentation: *Work On Issues* is a JIRA Time Tracking Permission, that is set as part of a JIRA Permission Scheme. *Work On Issues* is only effective for users that also have *Browse Projects* enabled. A JIRA permission scheme is a set of user/group/role assignments for project permissions like *Work On issues* and *Browse Projects*.

The **Log Work** button which opens the log work window is available in the header area for all [Time sheets](#). It is also possible to log work from an [JIRA Issue](#). The [User timesheet](#) is the most commonly used timesheet, where the typical user gets a good overview of her/his time tracking, for the selected period but can also do [in-line editing of worklogs](#). In some companies the User Timesheet does not become valid, except it has been [approved](#) by a user with [Approve Timesheet](#) permission (most often the Lead of a team) for the given period.

It is also possible to allocate user's time with the [Time Planning](#) feature. The planned vs. worked time can be viewed in the [Tempo Gadgets](#). JIRA Agile is a very popular product for the JIRA platform and Tempo has been [integrated with JIRA Agile](#) through the [Agile Timesheet](#), where users can switch between the **Planning Board** and back to the Agile Timesheet.

To get started, please check out the Tempo [Navigation Options](#) and feel free to contact us by clicking the links on the documentation pages footer.

Project Configuration

Projects can be displayed with custom color in Tempo Timesheets planning display for the timesheets.

In this chapter

Required permission

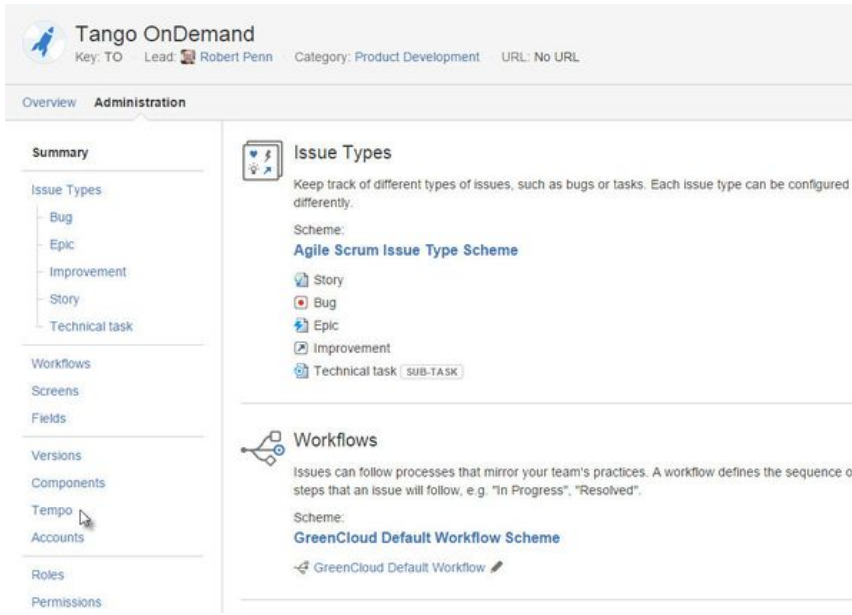

Project Administrator JIRA permission

Procedure

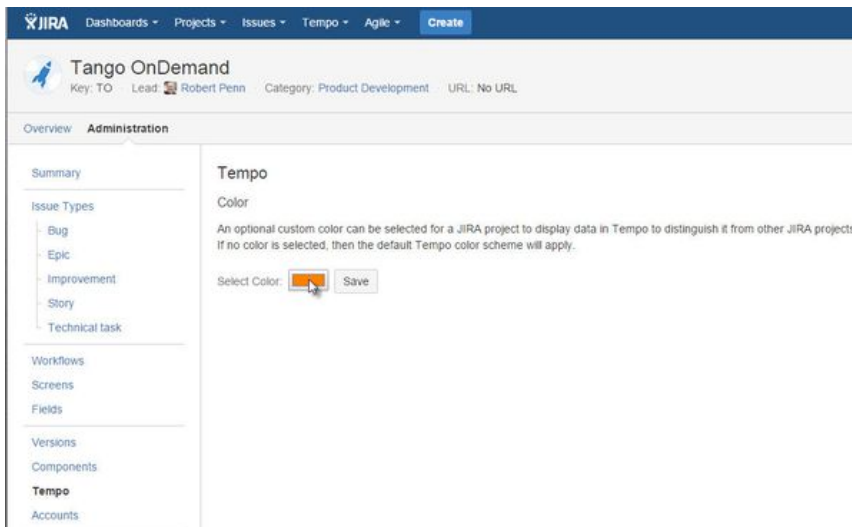

To start configuring a custom color for a project:

1. Log in to JIRA as a [Project Administrator](#).
2. Choose the **Projects** option from the cog icon  at top right of the screen.
 **Keyboard shortcut: g + g + start typing project**

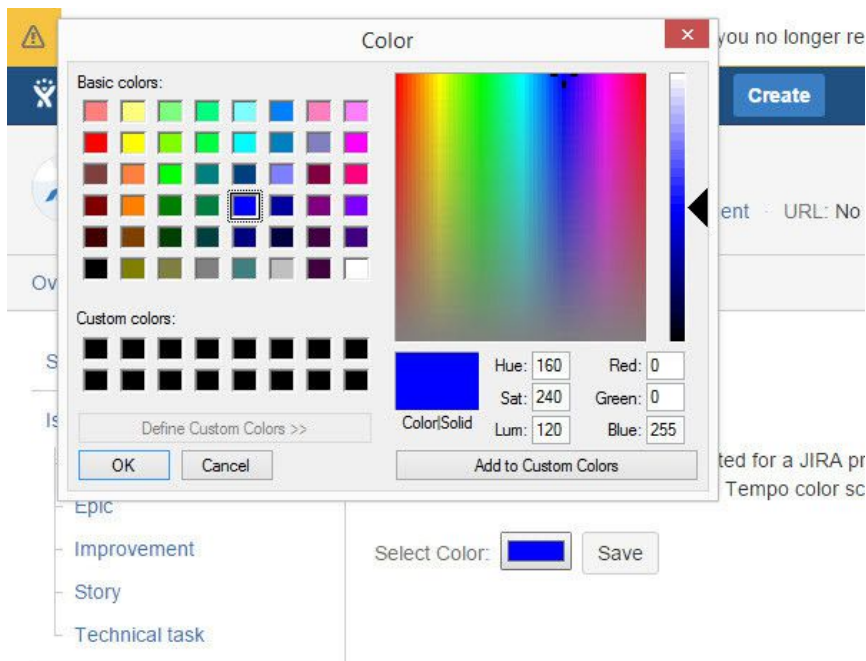

- Click on the project name from the project list, to open it's **Administration** section.

- Open the Tempo tab in the left sidebar, which has orange as default color code.
- Click on the color box to open the color palette.

- Select a custom color from the color palette.

- Click the **Save** button to save your settings for the project.

The selected colors for each project are displayed in the [Timesheets](#).

i For timesheets that are multi-user (given permissions), each user needs to be expanded to see the project colors.

The screenshot below is from a [Team Timesheet](#) for Team Tango and with users Jessie and Paco expanded.

The TO project has the default orange colour, but the TOS has been set to purple

Tempo Project Managers Role

Using Tempo Project Manager Role

This page explains a project role - **Tempo Project Managers**. The role is configured in the Administration for each JIRA Project.

Users in this role can see all worklogs within a particular project.

The following screenshots shows the Project Timesheet from the perspective of two users, Robert who is in the role and Jessie who is not in the role.

Configuring the Role

To configure the Tempo Project Managers role:

1. Log in to JIRA as a [Project Administrator](#).
2. Choose the **Projects** option from the cog icon cog wheel icon at top at top right of the screen.
 **Keyboard shortcut: g + g + start typing project**
3. Click on the project name from the project list, to open it's **Administration** section.
4. Open the **Roles** screen from the left sidebar, where the role is configured and/or updated.

The Roles screen in the Administration of the Turtle Online Store project (click to enlarge)

Tempo Tracker

The Tempo Tracker works like a stopwatch on issues in JIRA and keeps track of the time you spend working on them. Once you start working on an issue, you simply start the tracker and stop it when you are done. The tracker then pre-populates the [Log Work](#) form with the time spent, making it easy to enter your time accurately.

Accessing the Tracker

Accessing the tracker through the JIRA top navigation

Tracker Bar

When you open the Tracker Bar, it is displayed collapsed at the bottom right of the JIRA screen, with a **Start** and close (X) buttons. Click the Start button to start tracking time.

Once the tracker has started, it changes into a timer to show the elapsed time. An **Expand** button has also been added, along with pause and stop icons.

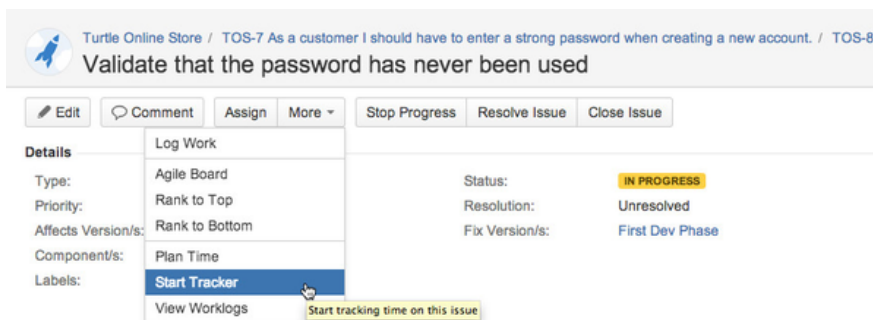

By clicking the Expand button, the Tracker Bar gets expanded to the left and the **Pause** and **Stop** buttons are shown.

Clicking the **Stop** button opens the [Log Work](#) window for the current user, with the **Worked** field populated with the time passed.

i Once the worklog has been submitted, the Tracker goes back to its initial state, as described in the first row of this table.

It is also possible to start the tracker from an issue, e.g. by selecting the **Start Tracker** option from the **More** actions menu.

Start Tracker from the More actions menu in an issue (click to enlarge)

The **Tracker Bar** is displayed at the bottom of the JIRA screen (initially collapsed), showing the time elapsed for the selected issue.

The Tracker Bar collapsed and running for a selected issue

The Tracker Bar expanded and running for the selected issue

i **Note**, that the Tracker Bar is slightly transparent. The Tempo Timesheets logo is clickable and opens the [User timesheet](#). The JIRA Issue Key and Summary are also a clickable link to the selected issue, in case the user has navigated away from it.

Clicking the **Stop Tracker** button opens the Log Work window for the current issue and user, with the **Worked** field populated with the time passed.

i The time passed is rounded up/down to the next minute. The tracker keeps running in the background until you have clicked the **Log Work** button in the window.

JIRA Agile Integration

This page and its child pages explain how Tempo Timesheets is integrated with [JIRA Agile](#).

Worklogs in Agile Issue Detail view

A Tempo Timesheets **Worklogs** section is available in [issue detail view](#) in JIRA Agile.

In this chapter

This section has two buttons, **My Worklogs** and **All Worklogs**. Each shows the respective worklogs associated with the item chosen.

The [Tempo Project Managers](#) role to view other users is used in this view so users that don't have this permission for the project can only see their own worklogs.

If there are no worklogs the message, *There are no worklogs* is shown.

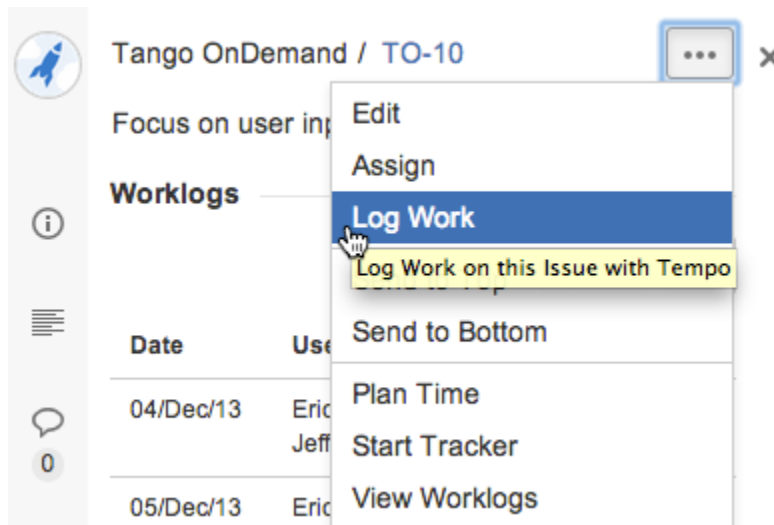

A **View Report** link is also available in the bottom right corner of this section. Clicking this link, opens the Tempo Timesheets [Issue list view](#) for the item.

Logging work from a JIRA Agile board

Tutorial

(Video without voiceover. Time: 0:33)

In the issue action list, **Log Work** opens the [Log Work](#) window.

Shortcut key to open the window is **w**.

Other Issue Actions in Agile

Several other Tempo actions are available in the issue action list:

- *Plan Time* opens the [Plan Time](#) window.
- *Start Tracker* starts the Tempo Timesheets [Tracker](#).
- *View Worklogs* opens the Issue [report view](#) for the item.

Agile Timesheet

This page explains how the **Agile Timesheet** works. It is a good way to see all Tempo Timesheets worklogs associated with JIRA Agile epics and/or sprints. It is *enabled* by default in the [global configuration](#) as a Lab feature.

Note

The Agile Timesheet is available only if you have JIRA Agile or JIRA Software installed and if your JIRA version is 6.4.12 or later.

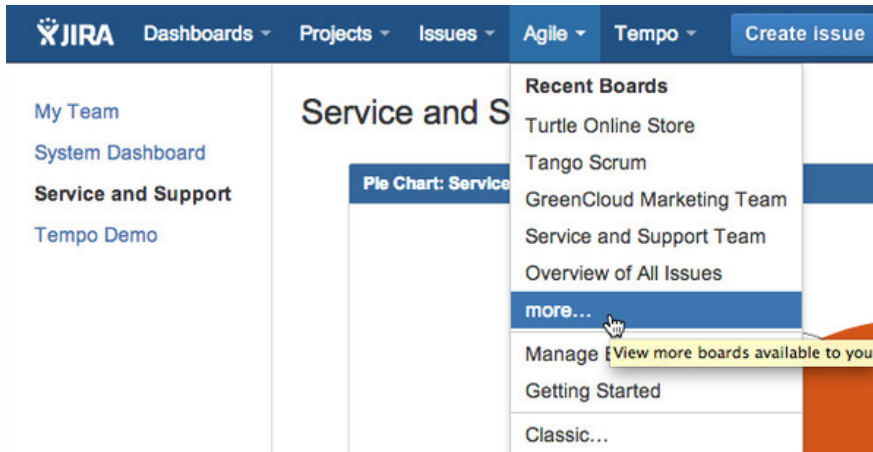

On this page

- [Accessing Agile Timesheet](#)
- [Issue Grouping](#)
- [Pagination](#)
- [Report](#)
- [Feedback](#)

In this chapter

Accessing Agile Timesheet

To access the Agile Timesheet in Tempo select a board in Agile menu select a Scrum or Kanban board, by clicking on the Board Name link

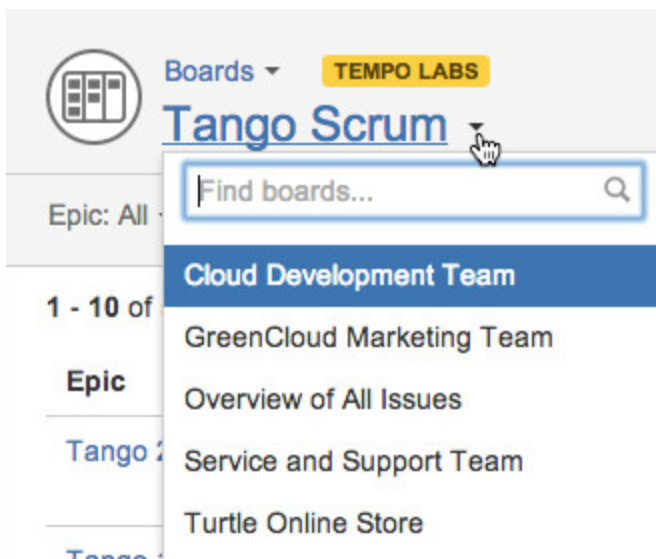

On the selected board you click the Time Tracking link to view the Agile Timesheet for the board.

The header for the Agile Timesheet has two menus available to the left, Teams and Boards

You can view other Timesheets by selecting Boards and search for other boards in your system.

Issue Grouping

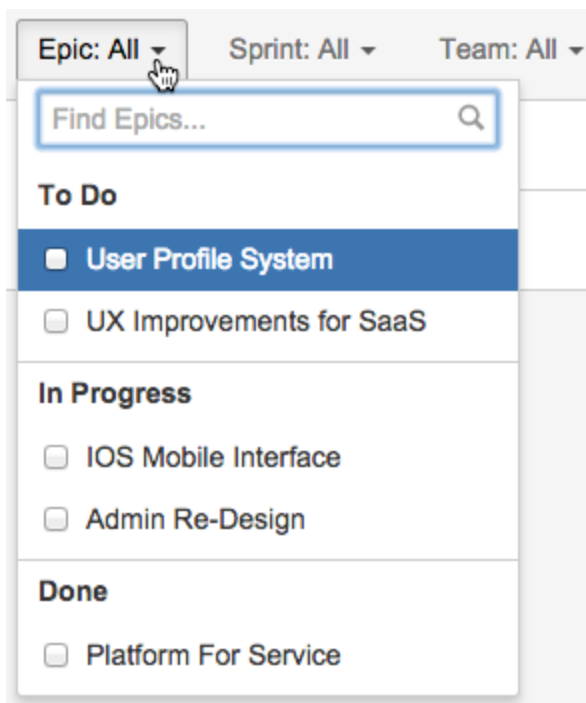

Worklogs from one or more **Epics** and **Teams** for both Scrum and Kanban boards are displayed in Agile Timesheet

Tango Scrum						
Epic: All Sprint: All						
21 - 30 of 55						
Epic	Sprint	Issue	Description	Author	Date	Worked

7th of 364h						

Users will only see their own **worklogs** unless they are in the **Tempo Project Managers** role to view other users, for the given JIRA Project. This means that if they have no worklogs and are not in the project role, the Agile Timesheet will be empty.

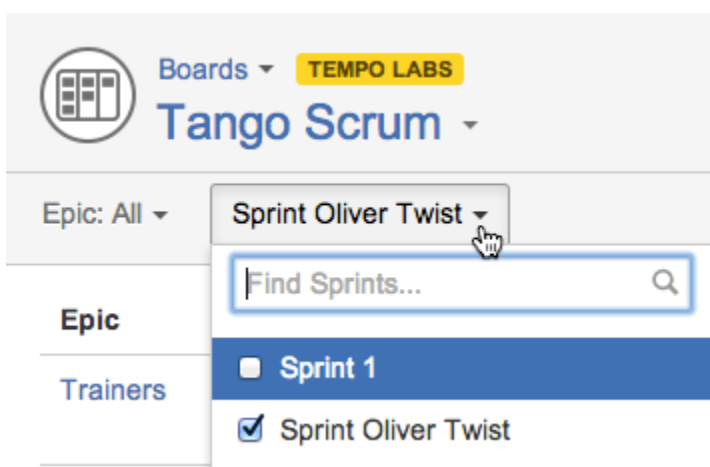

Tango Scrum						
Epic: All Sprint: Oliver Twist						
View: Issues						
Epic	Sprint	Issue	Original Estimate	Remaining Estimate	Worked	
						0h of 0h

The Epics are grouped by status (To Do, In Progress and Done) in the menu.

Scrum boards can also be refined by **Sprints**.

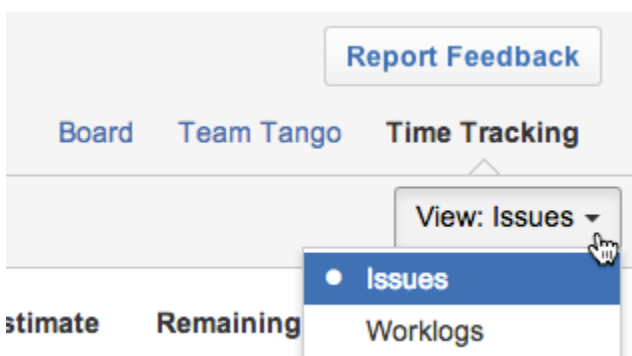

i The active sprint is selected by default, but if there is no active sprint - *Sprint: All* is selected.

Select the epics and/or sprints you want to filter by - either by selecting them directly from the list or by using the find field first and then selecting an item.

i The timesheet refreshes automatically, as soon as an item is selected in one of the menus.

The timesheet can also be viewed for Issues (default) and Worklogs.

- The items in the **Epic** and **Issue** columns, are links to the JIRA Issues.
- For **Worklogs** view:
 - The **Description** column, lists the descriptions given in the [Log Work](#) window.
 - The worklog owner name in the **Author** column is a link to the Author's JIRA Profile page.
 - The Date column lists when the worklog was created. *The sorting of the page is based on this column with the latest date at the top.*
 - i** If [Log work with start time](#) is set in Tempo Global Configuration, this format would be displayed in the column.
- For **Issues** view:
 - The **Original** and **Remaining Estimates** are displayed from the issue.
- The Worked column shows how many hours were logged on the JIRA Issue.
 - i** The format used on the form is "2h 15m", rather than 2.25.

Pagination

- The screenshot shows that the Page Size is set to 10, showing worklogs 41 - 50 of 1569.
 - i** The JIRA default setting for the Page Size is 50.

- To navigate between pages, click the page numbers in the bottom right corner or use the **Prev** or **Next** links.
 - i** For large sets of worklogs, two more navigation links are added for the **First** and **Last** page.
- Below the page navigation, the total worklog hours are shown for the page, out of the total number for the Epic/Sprint selection.

Report Feedback

- The Agile Timesheet is part of **Tempo Labs** and therefore a **Report Feedback** button is located in the upper right corner

 A screenshot of the 'Agile Timesheet Feedback' form. The title is 'Agile Timesheet Feedback'. Below it is a message: 'Please provide your feedback for the Tempo Agile Timesheet below:'. There are two input fields: 'Summary' (with a red asterisk) and 'Description' (a larger text area). Below the 'Description' field is a file upload section with a question mark icon, the text 'Attach file', a 'Choose Files' button, and 'No file chosen'. At the bottom right are 'Submit' and 'Close' buttons.

To send a feedback, fill in minimally the **Summary** field and hit the **Submit** button in the bottom right corner of the window or hit the **Close** link to cancel.

On submitting, an JIRA Issue is created for the Tempo team to acknowledge and work through.

Tempo Gadgets

The Tempo Timesheets gadgets allow users to track time spent on accounts, to monitor their teams' tracked time and resource allocation, and to chart this information visually. The gadgets can be added both on a [JIRA Dashboard](#) and on a page within [Confluence](#). This page gives an overview for the gadgets and how to add them to a dashboard.

Permissions

You need the [Approve Timesheets](#) permissions to see some data in the [Tempo accounts gadgets](#) and [Tempo teams gadgets](#). All Tempo users can see data in [Tempo user gadgets](#).

In this chapter

Video

Adding a Gadget

To add a Tempo gadget to a Dashboard, do the following:

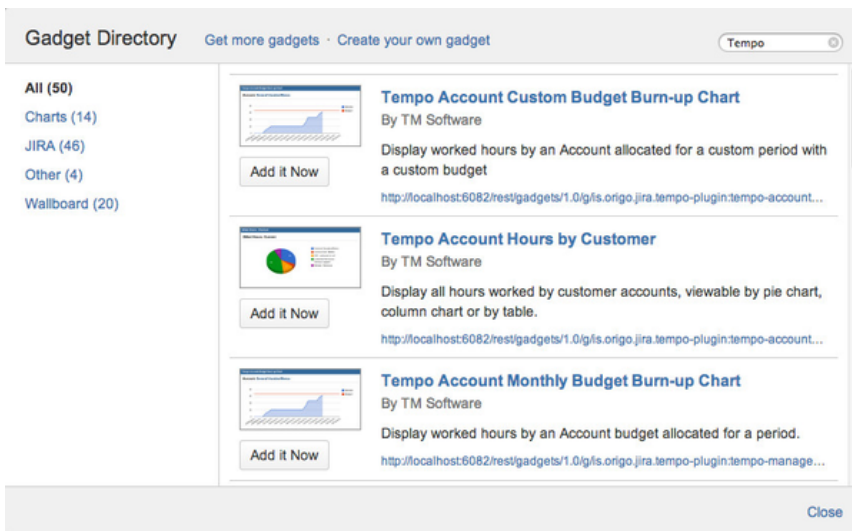

1. Go to your [JIRA Dashboard](#) and click the **Add Gadget** button.

The Add Gadget button

2. The **Gadget Directory** will appear. Locate a **Tempo** gadget of your choice or write Tempo in the search field to narrow the selection.

The JIRA Gadget Directory; Choose a Tempo gadget (click to enlarge)

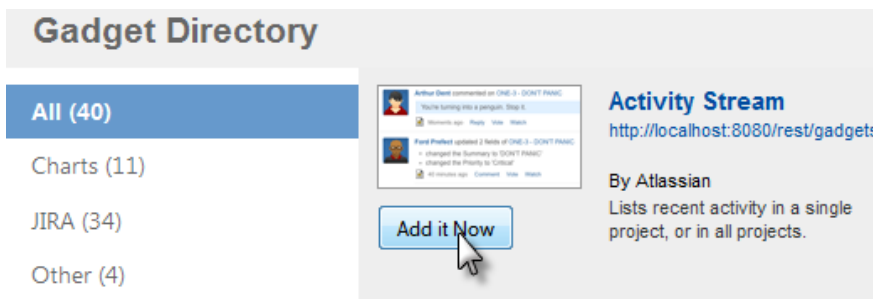

3. Click the **Add it Now** button, for the chosen gadget (repeat this step as needed).
4. When finished click the **Close** link in the right bottom corner of the Gadget Directory.
5. The Tempo gadget(s) will appear on your dashboard and ready for you to configure.

The images used in Tempo gadgets are generated by using the **Chart API** from **Google**. This means that in order for the Tempo gadgets to work, your computer needs to be **online**.

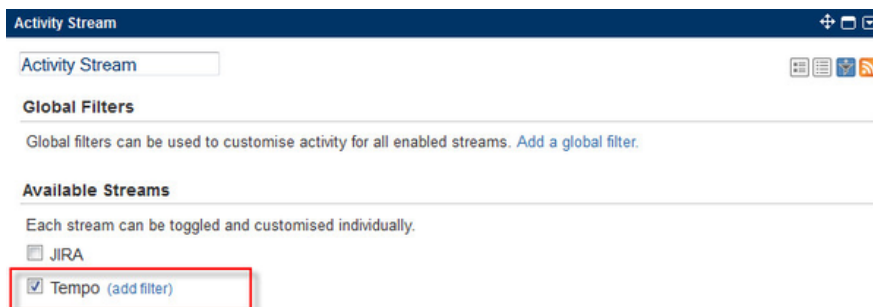

Tempo activity stream provider

This page explains that Tempo data is provided to the **Activity Stream** gadget. Select **Activity Stream** from the *Gadget Directory* and click **Add it Now** button.

Adding the Activity Stream gadget

Configuring the Activity Stream gadget to include Tempo

To add the *Gadget* do the following:

1. Select **Tempo** from the list of **Available Streams**
2. Select your preferred *Limit* and *Refresh* rate in the *Display Options*
3. Click the **Save** button.

The *Activity Stream* is displayed on your *Dashboard* showing recent activities from Tempo.

The Activity Stream gadget on a dashboard

Activity Stream

Tempo accounts gadgets

Gadgets for Managers

These gadgets display worklog and Tempo Account data and are only available for users with the [Approve Timesheet](#) permission for any Tempo team.

Account Hours by Customer

Plan, track, and allocate account resources for a designated period. View data in pie chart, bar chart or table format.

Total Hours

Track overall worked and/or planned time. View data in pie chart, bar chart or table format.

Account Custom Budget Burn-up Chart

Create a custom burn-up chart to monitor the progress of accounts, but also to plan and allocate resources accordingly.

Account Monthly Budget Burn-up Chart

Display the progress of hours worked by an account and its monthly budget. Plan, allocate, monitor resources and account budget projections.

Account Custom Budget Burn-up Chart

This is a child page of [Tempo Gadgets](#), explaining the **Account Custom Budget Burn-up Chart** gadget. This gadget displays the progress of hours worked on an Account and allows the user to insert a custom budget (Insert goal) and period. The gadget provides great flexibility in how data is visualized for a given account. This gadget is a great addition for *Managers* and *Executives* to monitor progress on Accounts, and to plan and allocate resources accordingly.

Required permission

[Approve Timesheet](#) Tempo Team permission

Configuration

Use a Dashboards' **Add Gadget** button to add this gadget, but it is both explained on the parent page and in the [JIRA documentation](#). The screenshot below shows the default configuration for this gadget, when it has just been added to a dashboard. The table below lists the configuration options, for each field or drop-down list in the gadget.

Table: Configuration options for each entry or field

Configuration Entry	Available Options
Team	All teams that the current user has Approve Timesheet permission for.
Select chart type	The available types are: <i>Area Chart</i> , <i>Column Chart</i> , <i>Pie Chart with Numbers</i> , <i>Pie Chart with Percentages</i> or <i>Table</i> .
Select a period	All the options start with the <i>current date</i> for each period. The options are <i>One week</i> , <i>Two weeks</i> , <i>Three weeks</i> , <i>One month</i> , <i>Two months</i> or <i>Three months</i> .

Refresh Interval

The values are *Never*, *Every 15 Minutes*, *Every 30 Minutes*, *Every 1 hour* or *Every 2 hours*.

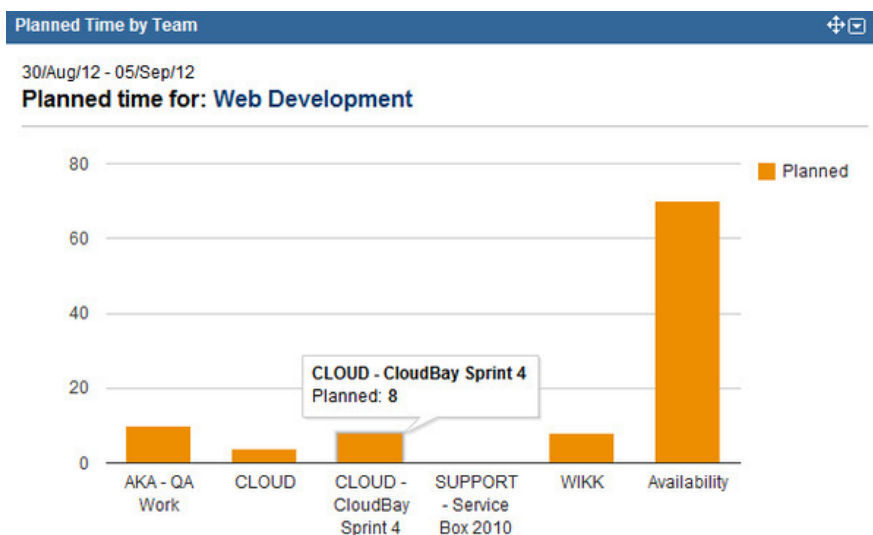

i The value says how often you would like the gadget to update the list of associated issues.

When all the configuration options have been set, click the **Save** button to display the results in a graph - see screenshots below.

Gadget display

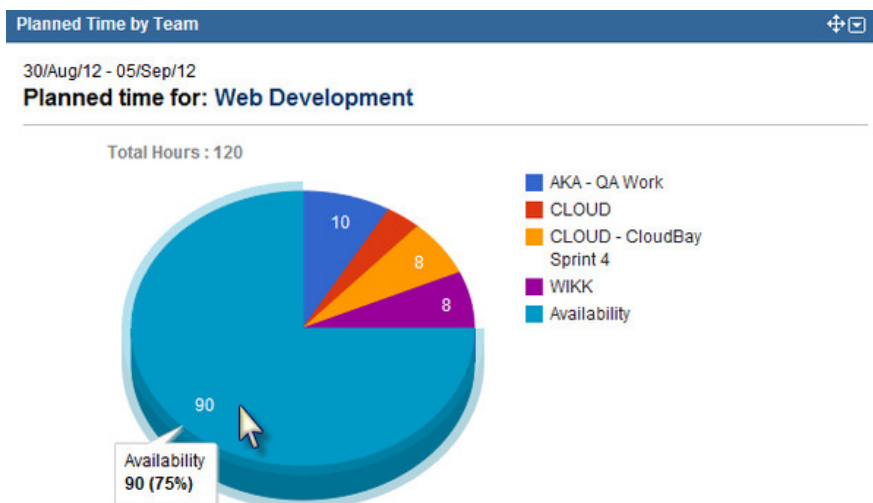

Examples of data displayed in this gadget are given below. Hover over the items on the charts to see more detail.

Column Chart with Planned time for the Web Development team

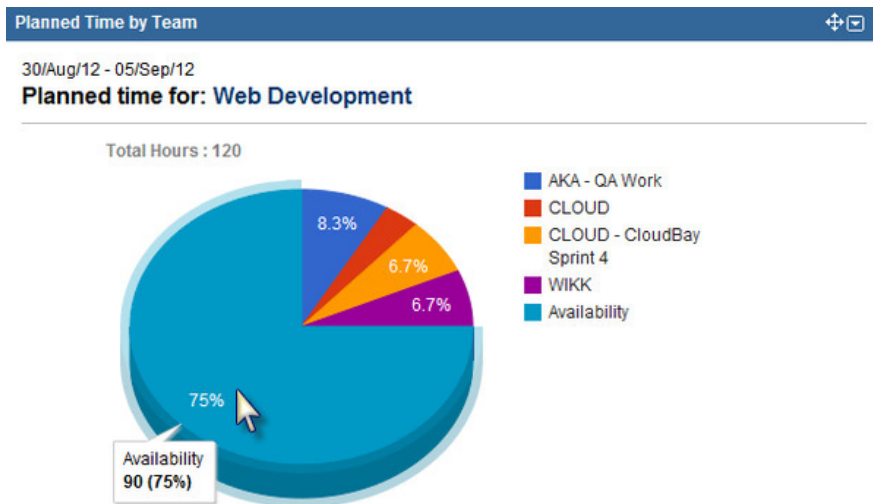

i The team name is an active link to the [Team Timesheet](#) for the selected team.

Pie Chart with Numbers for the Web Development team and its planned time

Pie Chart with Percentages for the Web Development team and its planned time

Same data as above in a Table, for the Web Development team and its planned time

Planned Time by Team

30/Aug/12 - 05/Sep/12

Planned time for: Web Development

Activity	Planned	%
AKA - QA Work	10.00	8.33 %
CLOUD	4.00	3.33 %
CLOUD - CloudBay Sprint 4	8.00	6.67 %
SUPPORT - Service Box 2010	0.00	0 %
WIKK	8.00	6.67 %
Availability	90.00	75 %
Total:	120	100 %

Same data shown on Area Chart, for the Web Development team and its planned time

Note that the Area Chart is a great view for the Lead of the team, to see when the team's resources are available for new projects.

The gadget can also be displayed on a **JIRA Wallboard**, given the plugin is installed.

Same data as above, but on a JIRA Wallboard

Team Hours

This is a child page of [Tempo Gadgets](#), explaining the **Team Hours** gadget. This gadget displays planned, worked, and required hours for each team member.

i The planned feature needs to be enabled in [Global Configuration](#), to be available in this gadget.

This gadget is a great for *Team Leads* and *Executives* to track overall planned and worked time.

Required permission

Approve Timesheet Tempo Team permission

Configuration

Use a Dashboards' **Add Gadget** button to add this gadget, but it is both explained on the parent page and in the [JIRA documentation](#). The table below lists the configuration options, for each field or drop-down list in the gadget.

Tempo user gadgets

Gadgets for All Users

These gadgets are available for all Tempo users. To see data for other users you need to be in the

In this chapter

[Tempo Project Managers](#) role for the project(s).

[Worklog Distribution Gadget](#)

Offers a variety of parameters to display worklog distribution in a column, pie or donut chart.

[User Timesheet Progress](#)

Display the progress of a user's logged hours within a current period to monitor planned and worked time.

[People in Version](#)

Monitor the status of planned and worked time for each user in a selected version.

[User Timesheet](#)

Monitor logged time by issues for each user during a designated period.

[User Timesheet Charts](#)

Display a user's logged hours within a current period viewable in area chart, bar chart, pie chart or table format.

User Timesheet Charts

This is a child page of [Tempo Gadgets](#), explaining the **User Timesheet Charts** gadget. This gadget displays the current user's logged hours within the current period.

In this chapter

 The **User Name** is an active link to the [User timesheet](#).

Configuration

Use a Dashboards' **Add Gadget** button to add this gadget, but it is both explained on the parent page and in the [JIRA documentation](#). The table below lists the configuration options, for each field or drop-down list in the gadget.

Several examples are given below, all with Group by Account, the period as the Last 90 days and displayed as one of the three charts available.

Configured as Group by Account, Last 90 days and displayed as Column Chart

i The filter name is an active link, which opens the [Advanced Timesheet](#) for the filter displayed.

To edit any of the configuration options, open the gadget menu in the top right corner and click the **Edit** option. This opens the configuration screen as above, where the options can be edited as needed and then saved for a new display.

Edit option in the gadget menu

Same data as above, but in a Pie Chart

Same data as above, but now in a Donut Chart

Values can be knocked out, both for the Pie and Donut Chart. To knock a value out, click on it's coloured circle and it is no longer included in the displayed image. To include it again, simply click on the dot again. The percentage displayed for each value, is always based on the total number of values included.

Pie Chart with the 'No account' option not displayed

The gadget can also be displayed on a [JIRA Wallboard](#), given the plugin is installed.

Same data as above, but on a JIRA Wallboard

Tempo Scheduler

JIRA Administrators can use the [Tempo Scheduler](#) both to schedule *closure* and *reminders* for adding and editing [worklogs](#) within an [open period](#). If the Scheduler is configured with [Email settings](#), all team members will receive an email according to the configuration.

A sample email from the Tempo Email Robot

In this chapter

Hi Erica

This is just a friendly reminder that Tempo will close for time registration for the current period soon.

Your Weekly timesheet status as of 02/Aug/13 16:12 GMT

Period:	28/Jul/13 to 03/Aug/13
Registration closing time:	06/Aug/13 23:59 GMT
Your required hours for this period:	40
Your logged hours for this period:	32
Status:	-8

Timesheet status

Status for period 26/Jul/13 - 25/Aug/13
Through 03/Aug/13: 40 / 48
Whole period: 40 / 168

Default period status

Status for 2nd period 10/Jul/13 - 09/Aug/13
Through 03/Aug/13: 40 / 144
Whole period: 40 / 184

2nd period status

Please be sure to complete your timesheet in a timely manner :)

Cheers,

The Tempo Email Robot

P.S. You are receiving this e-mail because you are in a Tempo group in this JIRA instance: <http://localhost:8081>

Greetings from the email robot

The table below explains the different sections of the email as in the screenshot above.

Table: Tempo Email Robot sections explained

Email Section	Description
Timesheet status	<p>This is the timesheet status taken on the minute that the email was sent.</p> <p>i In this example the user Erica needs to log 8 hours of work before the closure on 6th of August 2013 at 23:59 GMT</p>
Default period status	<p>Shows the total logged hours vs. total required hours from the first day of the period until the scheduler's closing day.</p> <p>The next line shows similar information for the whole period.</p>
2nd period status	<p>Similar information as for the default period above, given the 2nd period has been configured.</p>
Greetings from the email robot	<p>Greetings from the Tempo Email Robot and the reason for the email being sent.</p>

Grace Period

When the **scheduler** closes a period or part of a period, users are blocked from adding or editing their own worklogs that are on the closed days. However, a user who has Approve Timesheet permission for the team is still able to edit the worklogs of all team members. For users to be able to add and edit their own worklogs after the closing date, they must ask a user with **Approve Timesheet** permission in the team to grant them a short **Grace Period**, during which access is granted again.

To grant users a **Grace Period** of any length, a user with **Approve Timesheet** permission for the team can do so from the **Actions** list in the **Team Timesheet** and **Project Timesheet**.

i The Grace Period feature is part of the **Tempo activity stream provider**, which means the activity will be shown on a Dashboard, if the gadget has been added.

Granting a Grace Period in the Team Timesheet for Paco Salendros

In this chapter

The screenshot shows the 'Team Tango' header and a calendar view for May 14, 2014, to May 31, 2014. Below the calendar is a table of team members with columns for Name, P, %, Σ, and days of the week (14 W, 15 T, 16 F, 17 S, 18 S, 19 M, 20 T, 21 W). The table lists five members: Jessie Rosewood, Lars Petersen, Paco Salendros, Robert Penn, and Saul Goodman. A context menu is open for Paco Salendros, showing options: View Timesheet, Approval Log, Grace Period (highlighted), and User Preferences.

This opens the Grace Period window, where you fill in the following:

1. **Grace Hours** - The number of hours the user has to complete the timesheet period.
2. Select **Period from** and **Period to** dates for the Grace Period that needs to be opened.
3. Click the **Add Grace Period** button if you are done or the **Cancel** link to close without saving.

The Grace Period window

The 'Grace Period' window is shown for user **Paco Salendros**. It contains the following fields and controls:

- User:** Paco Salendros
- Grace Hours:** 2
- Period from:** 14/May/14
- Period to:** 20/May/14
- Buttons:** Add Grace Period, Cancel

The window above shows that Paco Salendros will be granted 2 hours to complete his timesheet (add or edit worklogs), for the Grace Period 14/May/14 - 20/May/14.

Keyboard Shortcuts

This page lists the shortcuts available in Tempo Timesheets.

Table: Tempo Timesheets shortcut list

Function	Shortcut	Description
Open Log Work window, both in a timesheet and JIRA Issue view	w	Press the w on the keyboard, when in a timesheet or JIRA Issue view, to open the window.

Go to next screen in a Timesheet	j	If the Project Timesheet has many screens, press j on the keyboard to go to the next screen.
Go to previous screen in a Timesheet	k	If the Project Timesheet has many screens, press k on the keyboard to go to the previous screen.
Go to Tempo Timesheets	g then t	If on a JIRA screen, unrelated to Tempo Timesheets, then use this shortcut to go to Tempo Timesheets.

Tempo JQL Functions

This page explains JQL functions for Tempo Timesheets, which make it possible to include Tempo data in the [JIRA advanced search](#).

i The functions can accept one or more argument(s)/value(s), given the accept an argument or a value.

internalIssues

This function returns all [internal issues](#), that the user has JIRA permissions to browse.

i It doesn't take any arguments, simply returns all issues that fall under the category of being internal.

```
issuekey in internalIssues()
```

team

The *team* function allows you to search for team members, that are for example either the JIRA issue assignee or reporter.

i It takes the team name as argument.

```
assignee in team("Team Tango")
reporter in team("Team Wikkieea")
```

tempoEpicIssues

Finally the function *tempoEpicIssues*, makes it possible to search for issues that are of type Epic and return all stories that are assigned to the Epic.

i It takes the issue key of the Epic as an argument and returns all of it's stories and sub-tasks.

```
issue in tempoEpicIssues("WIKK-19", "WDP-1")
```

Searching for accounts

For information about Tempo JQL functions for searching for accounts in a JIRA advanced search, see [Searching for accounts](#).

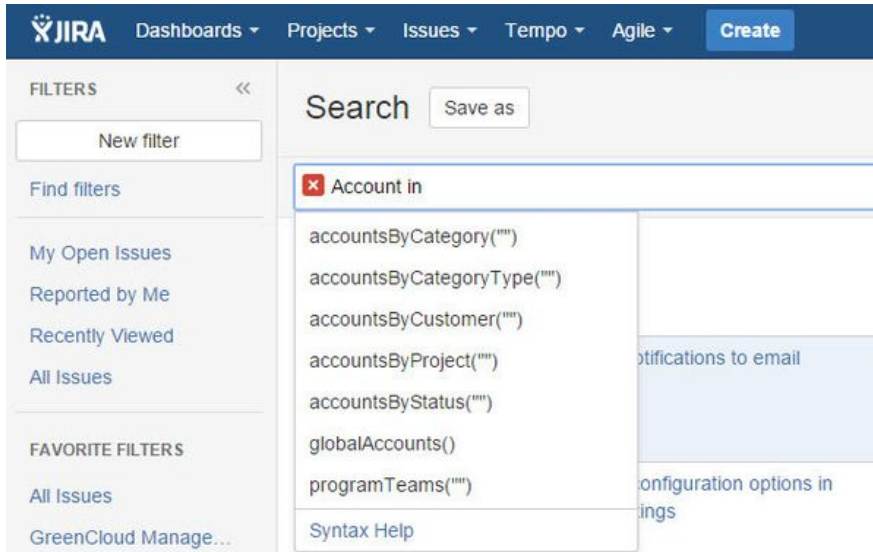

On this page

- [internalIssues](#)
- [team](#)
- [tempoEpicIssues](#)
- [Searching for accounts](#)

Searching for accounts

Extract from **Tempo Accounts** (plug-in) version: 2.x.x

This page explains JQL functions for accounts, which make it possible to include Tempo data in the JIRA advanced search.

i These functions are also available in the basic search.

The accounts JQL functions are based on the [Accounts Custom Field](#) name or **Account** and return data used on the JIRA issue level.

i This means that even if the custom field has been added as a worklog attribute through [Tempo Timesheets](#), the data extracted is still from the issue level.

Account = "Key"

This returns all JIRA issues that have been set to the account that matches the key used.

```
Account = "201409"
```

accountsByCustomer

The `accountsByCustomer()` returns all JIRA issues set to accounts for a specific [customer](#). With this function you can find all open issues for a specific customer or create a custom filter based on several customers that can be used to generate custom reports.

The value input(s) to the function, is the configured *key* or *name* (not case sensitive) for the [customer](#). Insert one or many, separated by a comma ",".

```
Account IN accountsByCustomer("Parliament of Utopia")
```

accountsByCategory

Likewise the `accountsByCategory()`, enables you to group JIRA issues on [account categories](#), that

On this page

- Account = "Key"
- `accountsByCustomer`
- `accountsByCategory`
- `accountsByCategoryType`
- `accountsByProject`
- `accountsByStatus`
- `globalAccounts`

Related pages

- [Accounts Custom Field](#)
- [Creating an account](#)
- [Configuring an account](#)
- [Import Custom CSV](#)
- [Blog on Accounts JQL Functions](#)

exist for your accounts. Examples are: *Development*, *Internal Cost* or *Billable*.

The value input(s) to the function, is the configured *key* or *name* (not case sensitive) for the [category](#). Insert one or many, separated by a comma ",".

```
Account in accountsByCategory( "BILLABLE" )
```

EXAMPLE

Account in accountsByCategory("") - Returns all issues that have an Account in customfield that has an assigned Category

accountsByCategoryType

The `accountsByCategoryType()`, enables you to group JIRA issues on account category types. The account category types are: *Billable*, *Capitalize*, *Internal* and *Operational*.

The value input(s) to the function, is the *name* (not case sensitive) for the category type. Insert one or many, separated by a comma ",".

```
Account in accountsByCategoryType( "INTERNAL" )
```

EXAMPLES

Account in accountsByCategoryType(Capitalized) - Returns all issues with Accounts belonging to the Category Type "Capitalized"

Account in accountsByCategoryType("") - Returns all issues that have an Account in customfield that has an assigned Category with a Category Type

accountsByProject

For accounts that have many [linked projects](#), it is useful to get all issues set to accounts for specific projects. This is possible with the `accountsByProject()` function. The value input(s) to the function, is the JIRA project *key*.

```
Account IN accountsByProject( "CLOUD" , "WIKK" ,  
"WDP" )
```

accountsByStatus

AVAILABLE FROM ACCOUNTS 1.7

The `accountsByStatus()`, enables you to group JIRA issues on account status. Account can have one of three statuses: *Open*, *Closed* and *Archived*.

The value input(s) to the function, is the *name* (not case sensitive) for the status. Insert one or many, separated by a comma ",".

```
Account IN accountsByStatus( "OPEN" , "CLOSED" ,  
"ARCHIVED" )
```

globalAccounts

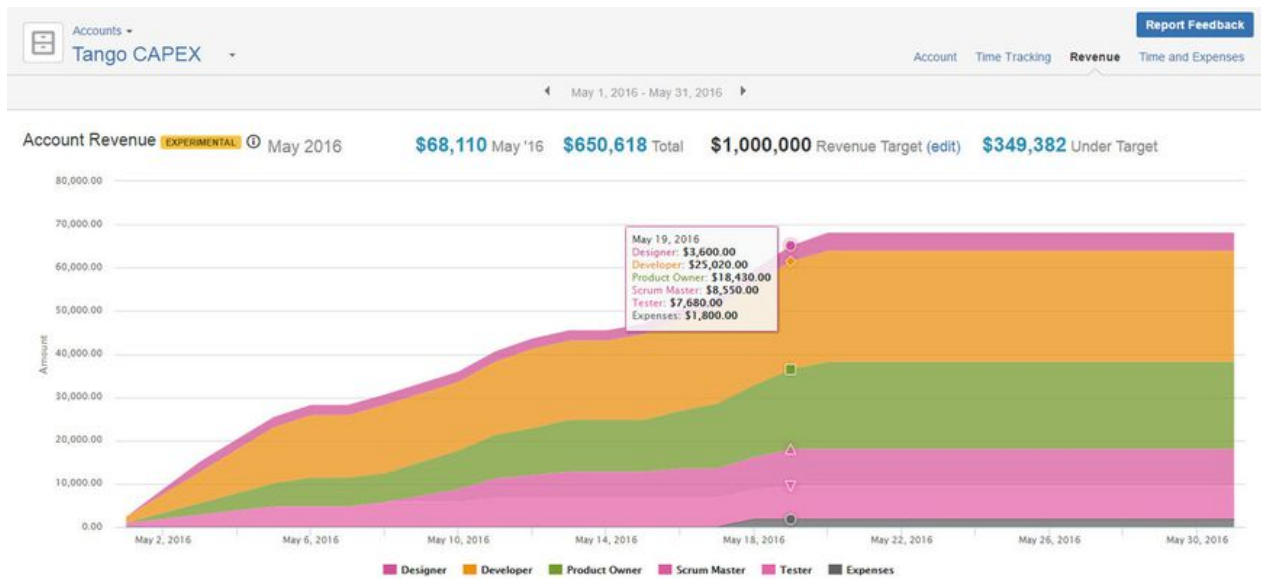

The last JQL function for accounts, is for the global accounts. Global accounts, are accounts that are not related to specific projects and can be associated with any issue in JIRA. This function returns a list of issues set to global account(s).

```
Account IN globalAccounts()
```

Managing revenue and billing

You can manage work for customers and accounts with Tempo Timesheets. For example, you can do the following tasks:

- Get an overview of the calculated revenue that your company makes, based on the hours that team members in different roles work on each account.

- Set a revenue target for each account and monitor how close the calculated revenue is to the target.
- View a graph of logged hours by account type (billable, capitalized, internal, operational).

- Add expenses to JIRA issues, and view a Time and Expenses report.

Key / Item	Description	Name	Price (\$)	Hours	Amount (\$)

Viewing accounts and teams

A Tempo account might represent, for example, a customer project, a cost center, or a contract. On the Accounts page, you can view a list of all accounts that you have access to.

A Tempo team might consist of, for example, the people in one department of your company, or it might be a scrum team if you work in an agile software development environment. On the Teams page, you can view a list of all teams that you have access to.

Accessing the Accounts page

Required permission

All users can access the Accounts page. However, the page lists only accounts that are linked to projects for which you have Browse Projects permission in JIRA.

Procedure

On the main menu bar, click **Tempo** > ACCOUNTS **more**.

Viewing account revenue and target

You can view an account revenue report, which consists of a table and graph that show the calculated account revenue for a month. You can set the total revenue target for the account, independent of time period, and monitor how much more revenue must be earned to reach the target.

Tutorial

Revenue reporting

Viewing the account revenue report

Required permission

One of the following permission types:

- Account Lead
- Tempo Account Manager
- Tempo Rate Manager
- [Browse Customer Revenue](#)

Procedure

To view the revenue report for an account, complete the following steps:

1. On the top menu bar, click **Tempo > ACCOUNTS more**.
2. On the Accounts page, select the account.
3. On the individual account page, in the upper-right corner, click **Revenue**.

Automatic calculation of revenue

- [Overview of the account revenue table](#)
- [Displaying revenue by issue type and expense category](#)
- [Overview of the account revenue graph](#)
- [Changing the revenue target](#)
- [Related topics](#)

Account revenue is automatically calculated based on the following parameters:

- The number of hours that are logged by team members on issues.
- The role of the team members.
- The price rates that correspond to the roles.
- The expenses that are logged by team members on issues.

The issues must be in projects that are linked to the account.

Overview of the account revenue table

The account revenue table is below the graph on the Account Revenue page and lists revenue by team role, issue type, and expense category.

Team Role / Issue Types		Rate (\$)	Hours	Amount (\$)
Team Role	Team Role / Issue Types	-	286.00	\$8,119.00
	Team Role / Issue Types	150.00	28.00	4,200.00
Designer	Story	150.00	28.00	4,200.00
	Developer	180.00	143.00	25,740.00
Developer	Bug	180.00	2.00	360.00
	Story	180.00	141.00	25,380.00
Product Owner	Internal Task	190.00	106.00	20,140.00
	Story	190.00	53.00	10,070.00
Scrum Master	Internal Task	190.00	53.00	10,070.00
	Story	190.00	45.00	8,550.00
Tester	Internal Task	120.00	25.00	4,750.00
	Story	120.00	20.00	3,800.00
Expenses	Travel	-	54.00	7,680.00
	Expenses	-	-	1,800.00

The four columns have the following meanings:

Column	Team Role	Rate (\$/hour)	Hours	Amount (\$)
Explanation	<p>The team role of users who logged work.</p> <p>Logged expenses are included at the bottom of the table.</p>	<p>The hourly price rate that corresponds to the team role. The price rates are defined for each role in a price table that is associated with the account.</p>	<p>The number of logged hours</p>	<p>For logged hours</p> <p>The calculated revenue, which is the rate multiplied by the number of logged hours</p> <p>For expenses</p> <p>The amount of the expense</p>
Tip		<p>A user who is in two teams might have different roles in each team and therefore two hourly rates. By default, work on an issue is charged at the user's highest rate. You can set work to be charged at the user's rate for a particular team by selecting that team in the Team field of the issue.</p>		

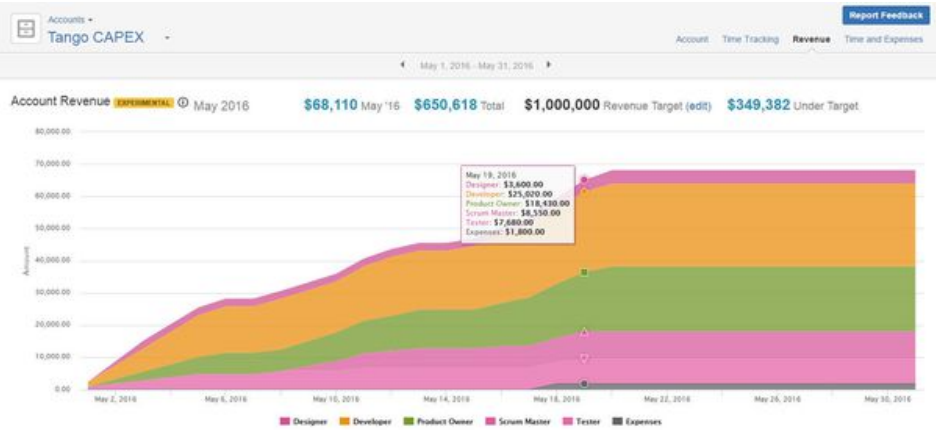

Displaying revenue by issue type and expense category

In the account revenue table, to display a breakdown of revenue by issue type and by expense category, complete the following steps:

1. In the first column, click the header, **Team Role**.
2. Select **Team Role / Issue Types** from the displayed list.

Overview of the account revenue graph

The account revenue graph displays revenue for different roles in different colors for one month.

The example above shows calculated revenue for an account that is called 'Tango CAPEX' for the month of May 2016. Above the graph, the four figures have the following meanings:

F i g u r e	\$68,110 May '16	\$650,618 Total	\$1,000,000 Revenue Target	\$349,382 Under Target
E x p l a n a t i o n	The revenue for the displayed month.	The accumulated revenue from the date that the account was created until the end of the displayed month.	The revenue target for the account, independent of time period.	The difference between the previous two figures. This figure turns green if the revenue is over target.

Changing the revenue target

Required permission

One on the following permission types:

- Tempo Account Manager
- Tempo Rate Manager

Procedure

To change the revenue target for the account, complete the following steps:

1. Above the graph, beside **Revenue Target**, click **edit**.
2. Type the value of the new target.
3. Click the check mark .

Viewing logged time by account type

For each team, you can view a *team utilization report*, which consists of a bar chart and table that show the number of logged hours by account type (billable, capitalized, internal, operational).

Required permission

- Tempo Time-Tracking permission
- Browse Team permission for the team
- One of the following roles or permission types:

Role or permission type	Included in the report
Team lead, or Approve Timesheet permission for the team	Logged hours of each team member
Team member	Your logged hours
Tempo Project Managers role	Hours that team members logged to the projects that you manage

No report is displayed for periods in which there are no logged hours to be displayed.

Tutorial

Team utilization reporting

Viewing the team utilization report

Procedure

To view the utilization report for a team, complete the following steps:

1. On the main menu bar, click **Tempo** > **TEAMS more**.
2. On the Teams page, click the name of the team.
3. On the individual team page, in the upper-right corner, click **Utilization**.

Example of a team utilization table

The team utilization table is displayed below the bar chart on the Team Utilization page.

Example of a team utilization bar chart

[Click to enlarge](#)

The totals at the top of the chart are rounded for readability.

Tips

- You can switch between weeks and team members on the horizontal axis by clicking the buttons under the chart.
- You can switch between hours and percentage of time on the vertical axis by clicking the buttons under the chart.
- You can view more detailed information about each bar by hovering over the chart, as shown on the example above.

Displaying information for one bar

In the team utilization table, you can display information for a single bar of the chart by clicking the bar. You can reset the table to show all data from the chart by clicking the bar again.

Showing one week in table by clicking on bar in chart

Missing data

If the account, account category, customer, or account category type is not defined for issues, logged time is displayed in gray in the chart and table. You can add the missing information by [resolving unaccounted hours](#).

Missing data is indicated in gray

Exporting a report as a .pdf file or .xls file

You can export the time-and-expenses report as a .pdf file or a .xls file by completing the following steps:

1. In the upper-right corner of the report, click **Export**.
2. From the list, select **Print** (for a .pdf file) or **Export to Excel** (for a .xls file).

Price (\$)	Hours	Amount (\$)
	141.50	21,965.00

The .pdf file is a printout of the report. The .xls file contains the following sheets:

1. A Time and Expenses spreadsheet, which includes hours and expenses
2. A Time spreadsheet, which includes only logged hours
3. An Expenses spreadsheet, which includes only expenses

The Time spreadsheet contains all logged hours and the following details:

- Customer (key, name)
- Project (key, name)
- Account (key, name)
- Issue key (key)
- Issue summary (summary)
- Date (Atlassian date format, and breakdown into day, month, and year)
- Description
- Username
- Full name
- Role
- Hours
- Rate
- Amount
- Currency

The Expenses spreadsheet contains all logged expenses and the following details:

- Customer (key, name)
- Project (key, name)
- Account (key, name)
- Issue key (key)
- Issue summary (summary)
- Date (Atlassian date format, and breakdown into day, month, and year)
- Description
- Username
- Full name
- Role
- Expense category
- Amount
- Currency

Custom price tables

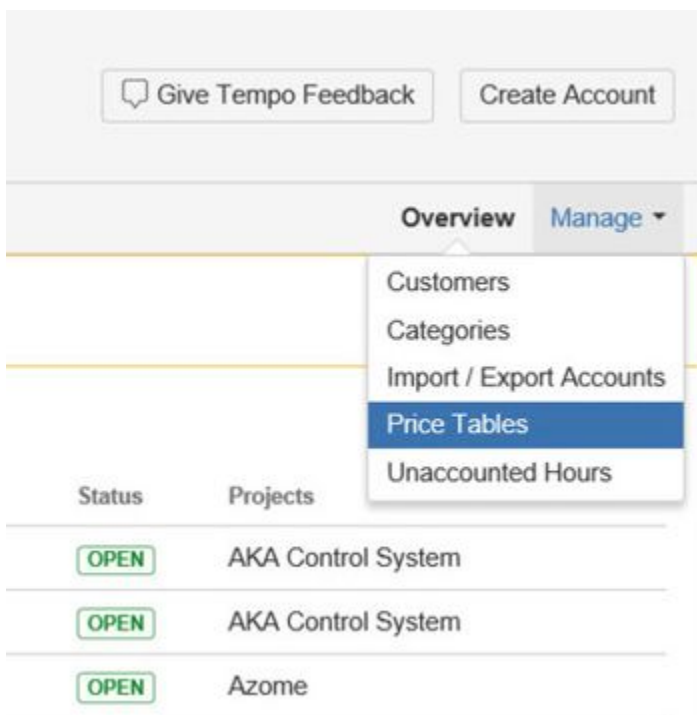

Price Tables

Price Tables are used when an account is associated with JIRA issues. The rates defined in price tables are used to calculate revenue in the [account revenue report](#) and the [time-and-expenses report](#), for each account. The time-and-expenses report shows revenue for all hours logged. The calculations for revenue are as follows:

- Calculated Revenue for account = Sum (Logged work on JIRA issue * price rate defined for role).

To edit price rates, open the Manage menu in the top right corner of the Accounts Navigator and select Price Tables.

Selecting Price Tables option from the Manage menu

Selecting the Price Tables option opens the **Price Tables** screen as in the screenshot below.

The manage Price Tables main screen

Categorizing expenses

Adding an expense category

Expense categories are managed for sorting expenses displayed in the account's revenue report. For a better control of which categories are available for adding expense, Expense categories are configured in the Manage Categories.

Manage Categories - click to enlarge

Required permission

One of the following permission types:

- JIRA Administrators permission
- Tempo Account Manager

Procedure

To add an expense category, complete the following steps:

1. On the top menu bar, click **Tempo > ACCOUNTS more**.
2. On the Accounts page in the upper-right corner, select **Manage > Categories**.
3. On the Categories page, click the Expense Categories tab to view all Expense Categories listed.
4. Add a Key, Name and select the Type of the category.
5. Click the Add button

Procedure

To edit an expense category, complete the following steps:

1. On the top menu bar, click **Tempo > ACCOUNTS more**.
2. On the Accounts page in the upper-right corner, select **Manage > Categories**.
3. On the Categories page, click the field you want to edit.
4. Click the Update button

Related topics

- [Viewing account revenue and target](#)
- [Adding expenses to JIRA issues](#)

Deleting an expense category

If no expense is logged to a category, the category can be deleted but an option to delete a category is displayed for each expense category.

Procedure

To delete an expense category, complete the following steps:

1. On the top menu bar, click **Tempo > ACCOUNTS more**.
2. On the Accounts page in the upper-right corner, select **Manage > Categories**.
3. On the Categories page, click the Delete button for the expense category you want to delete.
4. In the delete confirmation window, click the Delete button.

Adding expenses to JIRA issues

As well as logging time that you worked on an issue, you can log expenses to the issue.

If you log expenses to an issue, the Account Lead (for the account that is associated with the issue) can view the expenses in the [Time and Expenses report](#) and on the [account revenue graph](#). Other users with Manage Accounts permission can also view the report and graph.

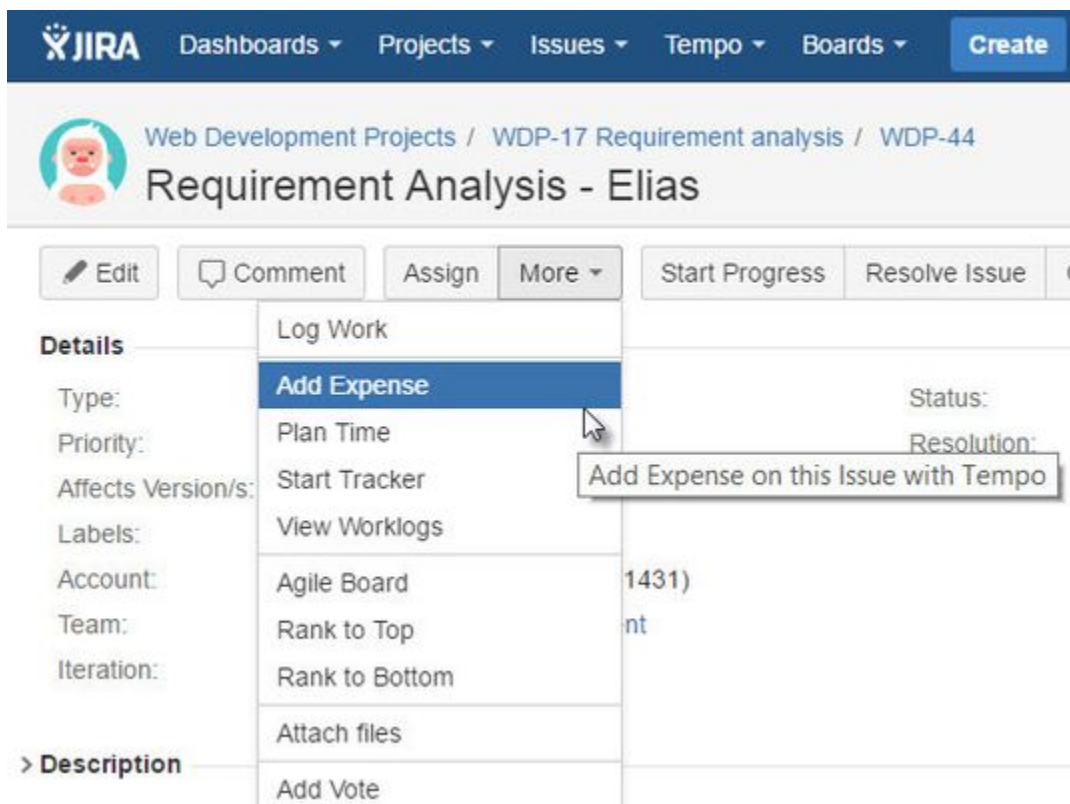

Required permission

Edit Issue permission (in JIRA)

Procedure

To add an expense to a JIRA issue, complete the following steps:

1. On the menu bar of the issue, click **More > Add Expense**.

2. In the Add Expense window, fill in the requested information.

Tip

In the **Category** field, you can select an expense category from the list. Alternatively, you can create a new category, as in the following example to create the category 'Hotels':

- a. In the **Category** field, type `Hotels`.
- b. Underneath the field, click **Hotels - (New)**.

3. Click **OK**.

In the **Expenses** section of the issue, only expenses that you added are displayed.

Expenses section of a JIRA issue (Click to enlarge)

If the issue is editable, you can also edit or delete expenses.

Resolving unaccounted hours

Logged hours that cannot be associated with an account category type (for example, the Billable type or the Capitalized type) are said to be unaccounted for. Unaccounted hours are not correctly reported in the [Utilization report](#) or in the [Revenue report](#).

Tutorial

Unaccounted hours

Viewing unaccounted hours

Required permission

One of the following permission types:

- JIRA Administrators permission
- Tempo Account Manager

Procedure

To view a list of unaccounted hours, complete the following steps:

1. On the top menu bar, click **Tempo > ACCOUNTS more**.

The following message about unaccounted hours might be displayed near the top of the page:

There are unaccounted hours to review. [Review unaccounted hours](#).

On this page

- [Tutorial](#)
- [Viewing unaccounted hours](#)
- [Accounting for hours](#)
- [Related topics](#)

If the above message is *not* displayed, all hours are accounted for.

2. If the above message *is* displayed, click **Review unaccounted hours**.

Tip

Alternatively, you can access the Unaccounted Hours page as follows: on the Accounts page, in the upper-right corner, click **Manage > Unaccounted Hours**.

A list of projects and issues is displayed. Work was logged on these issues, but one of the following situations is true for each issue:

- The issue is not associated with an account.
- The issue is associated with an account, but the account is not linked to an account category.
- The issue is associated with an account, and the account is linked to an account category, but the account category is not linked to an account category type.

Accounting for hours

On the Unaccounted Hours page, you can account for hours for each issue by selecting the appropriate account, account category, or account category type.
